

PHASE CONTROL SCR

Description/Features

The 12TTS08 **SAFEIR** series of silicon controlled rectifiers are specifically designed for medium power switching and phase control applications. The glass passivation technology used has reliable operation up to 125° C junction temperature.

Typical applications are in input rectification and crow-bar (soft start) and these products are designed to be used with International Rectifier input diodes, switches and output rectifiers which are available in identical package outlines.

	$V_T < 1.2V @ 8A$ $I_{TSM} = 140A$ $V_{RRM} = 800V$
