

2MBI900VXA-120P-54

IGBT Modules

IGBT MODULE (V series) 1200V / 900A / 2 in one package

Features

High speed switching Voltage drive Low Inductance module structure

F Fuji Electric

Applications

Inverter for Motor Drive

AC and DC Servo Drive Amplifier

Uninterruptible Power Supply

Industrial machines, such as Welding machines

Maximum Ratings and Characteristics

Absolute Maximum Ratings (at Tc=25°C unless otherwise specified)

Items	Symbols	Conditions		Maximum ratings	Units	
Collector-Emitter voltage	VCES				V	
Gate-Emitter voltage	V _{GES}			±20	V	
Collector current	1	Continuous	Tc=25°C	1200		
	Ic		Tc=100°C	900		
	c pulse	1ms		1800	А	
	-lc					
	- c pulse	1ms		1800		
Collector power dissipation	Pc	1 device	1 device		W	
Junction temperature	Tj			175		
Operating junction temperature (under switching conditio	ns) Tjop			150	∘c	
Case temperature	Tc					
Storage temperature	Tstg			-40 ~ +150		
Isolation voltage between terminal and copper base (*	1) Viso	AC : 1min.		4000	VAC	
between thermistor and others (*2)	Viso	AC . IIIIII.				
Mounting		M5		6.0		
Screw torque (*3) Main Terminals	-	M8		10.0	N m	
Sense Terminals		M4		2.1		

Note *1: All terminals should be connected together during the test.

Note *2: Two thermistor terminals should be connected together, other terminals should be connected together and shorted to base plate during the test. Note *3: Recommendable Value : Mounting 3.0 ~ 6.0 Nm (M5) Recommendable Value : Main Terminals 8.0 ~ 10.0 Nm (M8) Recommendable Value : Sense Terminals 1.8 ~ 2.1 Nm (M4)

• Electrical characteristics (at Tj= 25°C unless otherwise specified)

	Symbolo	Conditions	Conditions		Characteristics		
ems	Symbols	Conditions		min.	typ.	max.	Units
Zero gate voltage collector current	ICES	V _{GE} = 0V, V _{CE} = 1200V		-	-	8.0	mA

Equivalent Circuit Schematic

Definition of on-state voltage at terminal and switching characteristics

Fuji defined VCE value of terminal by using Sense C1 and Sense C2E1 for Upper arm and Sense C2E1 and Sense E2 for Lower arm .

Switching characteristics of VCE also is defined between Sense C1 and Sense C2E1 for Upper arm and Sense C2E1 and Sense E2 for Lower arm .

Please use these terminals whenever measure spike voltage and on-state voltage .

WARNING

1. This Catalog contains the product specifications, characteristics, data, materials, and structures as of September 2013. The contents are subject to change without notice for specification changes or other reasons. When using a product listed in this Catalog, be sure to obtain the latest specifications.

- 2.All applications described in this Catalog exemplify the use of Fuji's products for your reference only. No right or license, either express or implied, under any patent, copyright, trade secret or other intellectual property right owned by Fuji Electric Co., Ltd. is (or shall be deemed) granted. Fuji Electric Co., Ltd. makes no representation or warranty, whether express or implied, relating to the infringement or alleged infringement of other's intellectual property rights which may arise from the use of the applications described herein.
- 3.Although Fuji Electric Co., Ltd. is enhancing product quality and reliability, a small percentage of semiconductor products may become faulty. When using Fuji Electric semiconductor products in your equipment, you are requested to take adequate safety measures to prevent the equipment from causing a physical injury, fire, or other problem if any of the products become faulty. It is recommended to make your design fail-safe, flame retardant, and free of malfunction.
- 4. The products introduced in this Catalog are intended for use in the following electronic and electrical equipment which has normal reliability requirements.
- Computers OA equipment Communications equipment (terminal devices) Measurement equipment
- Machine tools Audiovisual equipment Electrical home appliances Personal equipment Industrial robots etc.
- 5.If you need to use a product in this Catalog for equipment requiring higher reliability than normal, such as for the equipment listed below, it is imperative to contact Fuji Electric Co., Ltd. to obtain prior approval. When using these products for such equipment, take adequate measures such as a backup system to prevent the equipment from malfunctioning even if a Fuji's product incorporated in the equipment becomes faulty.
- Transportation equipment (mounted on cars and ships)
 Trunk communications equipment
- Traffic-signal control equipment
 Gas leakage detectors with an auto-shut-off feature
 Emergency equipment for responding to disasters and anti-burglary devices
 Safety devices
- Medical equipment
- 6. Do not use products in this Catalog for the equipment requiring strict reliability such as the following and equivalents to strategic equipment (without limitation).
- Space equipment
 · Aeronautic equipment
 · Nuclear control equipment
- Submarine repeater equipment

7. Copyright ©1996-2013 by Fuji Electric Co., Ltd. All rights reserved. No part of this Catalog may be reproduced in any form or by any means without the express permission of Fuji Electric Co., Ltd.

8.If you have any question about any portion in this Catalog, ask Fuji Electric Co., Ltd. or its sales agents before using the product. Neither Fuji Electric Co., Ltd. nor its agents shall be liable for any injury caused by any use of the products not in accordance with instructions set forth herein.
