2N3954A MONOLITHIC DUAL N-CHANNEL JFET

micross

The 2N3954A is a Low Noise, Low Drift, Monolithic Dual N-Channel JFET

The 2N3954A family are matched JFET pairs for differential amplifiers. The 2N3954A family of general purpose JFETs is characterized for low and medium frequency differential amplifiers requiring low offset voltage, drift, noise and capacitance

The 2N3954A family also exhibits low capacitance - 6pF max and a spot noise figure of -0.5dB max. The part offers a superior tracking ability.

The hermetically sealed TO-71 and TO-78 packages are well suited for high reliability and harsh environment applications.

(See Packaging Information).
