

Low voltage fast-switching PNP power transistors

Features

- Very low collector-emitter saturation voltage
- High current gain characteristic
- Fast-switching speed
- In Compliance with the 2002/93/EC European Directive
- Surface mounting devices in medium power SOT-223 and SOT-89 packages
- Available in tape & reel packing

Applications

- Emergency lighting
- Led
- CCFL drivers (back lighting)
- Voltage regulation
- Relay driver

Description

The 2STF2360 and 2STN2360 are PNP transistors manufactured using new "PB-HDC" (Power Bipolar High Density Current) technology. The resulting transistor shows exceptional high gain performances coupled with very low saturation voltage.

3 Package Mechanical Data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
