Description

The SSM70T03H is in a TO-252 package, which is widely used for commercial and industrial surface-mount applications, and is well suited for low voltage applications such as DC/DC converters. The through-hole version, the SSM70T03J in TO-251, is available for low-footprint vertical mounting. These devices are manufactured with an advanced process, providing improved on-resistance and switching performance. The devices have a maximum junction temperature rating of 175°C for improved thermal margin and reliability.
