GENERAL DESCRIPTION

Aeroflex's ACT8505 is a radiation tolerant, 64 channel multiplexer MCM (multi-chip module) with ESD protection for use in space applications. It is designed to provide a high input impedance with power on or off.

The ACT8505 has been specifically designed to meet exposure to radiation environments. It is available in a 96 lead High Temperature Co-Fired Ceramic (HTCC) Quad Flatpack (QFP). The module is guaranteed operational from -55°C to +125°C and is ideal for demanding military and space applications.

ORGANIZATION AND APPLICATION

The ACT8505 consists of four 16 channel multiplexers arranged as shown in the Block Diagram. The Multiplexer channels 0-63 are controlled by address lines A₀-A₃. The mux output monitor is controlled by address lines C₀ and C₁.
