

Am2615/9615

Dual Differential Line Receivers

Distinctive Characteristics:

- Dual differential receiver (Am9615) pin-for-pin equivalent to the Fairchild 9615
- Dual differential receiver for single-ended data (Am2615)
- Single 5-volt supply
- High common-mode voltage range (± 15 volts)

- Frequency response control, strobe, and internal terminating resistor
- Am2615 has fail safe capability
- Choice of uncommitted collector or active pull-up outputs
- 100% reliability assurance testing in compliance with MIL-STD-883

FUNCTIONAL DESCRIPTION

The Am2615 and Am9615 are dual differential line receivers designed to receive digital data from transmission lines and operate over the military and industrial temperature ranges using a single 5 volt supply. The Am2615 can receive 3 volt single ended and the Am9615 ± 500 mV differential data in the presence of high level (± 15 V) common mode voltages and deliver undisturbed logic levels to the following DTL or TTL circuitry. The response time of each receiver and thereby immunity to AC noise can be controlled by an external capacitor. A strobe is provided for each receiver together with a 130Ω input terminating resistor. Each output has an uncommitted collector with an active pull-up network available on an adjacent pin.

The Am2615 is identical to the Am9615 except for the input offset (threshold) voltage. The Am2615 has an input threshold of ~ 1.5 V compatible with DTL & TTL logic. The Am9615 has an input threshold of ~ 0 V. The Am2615 can directly replace the Am9615 and give fail safe protection in differential systems where the input difference is > 2.0 V.

Am2615/9615

MAXIMUM RATINGS (Above which the useful life may be impaired)

Storage Temperature	-65°C to +150°C
Temperature (Ambient) Under Bias	-55°C to +125°C
Supply Voltage to Ground Potential (Pin 16 to Pin 8) Continuous	-0.5 V to +7 V
DC Voltage Applied to Outputs for HIGH Output State	-0.5 V to +13.2 V
DC Strobe Input Voltage	-0.5 V to +5.5 V
DC Data Input Voltage	-20 V to +20 V
Output Current, Into Outputs	30 mA
DC Input Current	maximum current is defined by DC Input Voltage

Am2615 ELECTRICAL CHARACTERISTICS OVER OPERATING RANGE

Am2615XM $V_{CC} = 4.5V$ to $5.5V$ $T_A = -55^\circ C$ to $+125^\circ C$ (MIL grade)
