## Description

Advanced Power MOSFETs from APEC provide the designer with the best combination of fast switching, low on-resistance and cost-effectiveness.

The AP09N70P-A-HF-3 is in the popular TO-220 through-hole package which is widely used in commercial and industrial applications where a small PCB footprint or an attached heatsink is required.

This device is well suited for use in high voltage applications such as off-line AC/DC converters.
