

▼ Simple Drive Requirement

▼ Low On-resistance

▼ Fast Switching Performance

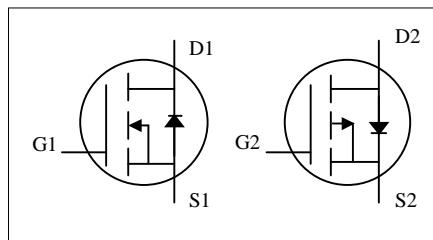

▼ RoHS Compliant & Halogen-Free

**Description**

AP4503 series are from Advanced Power innovated design and silicon process technology to achieve the lowest possible on-resistance and fast switching performance. It provides the designer with an extreme efficient device for use in a wide range of power applications.

The SO-8 package is widely preferred for all commercial-industrial surface mount applications using infrared reflow technique and suited for voltage conversion or switch applications.
