7. Surface Mount Recommendation (In mm)

NOTE

1. The number and size of ground via holes in a circuit board are critical for thermal and RF grounding considerations.
2. Recommended is that the ground via holes be placed on the bottom of the lead pin 2 and exposed pad of the device for better RF and thermal performance, as shown in the drawing at the left side.

8. Recommended Soldering Reflow Profile

9. Family Products Information

ASB's AWB-series single-ended CATV amplifiers are available in different gain levels such as 12 dB, 17 dB, and 20 dB in which they are categorized by two groups according to the device voltage, 5 V and 8 V, so that a user can select the amplifier for different gain stages to design their system with ease.
