Checklist of the items in the panasonic standard delivery specifications

Please check if the delivery specifications include the following items.
(If a listed item is not includes, please make sure to describe the reason why it has not been included.)

Ver.1.1

No.	Item description	Listing check			Reason for not including (Ex Under research, confidential)
1	Part No. reference table (The global part No. and manufacturer part No. must be listed for series part numbers)	☐Yes	☐No	☑N/A	
2	Part number structure (List the type, constant, class stc for a series part No.)	☐Yes	☐No	☑N/A	
3	Place of production, factory name, country of origin	☑Yes	☐No	☐N/A	
4	Electrical characteristics (Measuring circuit, measurement condition, dielectric strength, surge voltage, insulation resistance, rates capacity etc.)	☑Yes	☐No	☐N/A	
5	Mechanical characteristics (Test method, terminal strength, tensile strength, anti-vibration, solder heat resistance, ease of soldering etc.)	☑Yes	☐No	☐N/A	
6	External shape/dimensions (External shape drawing, simensions with tolerance)	☑Yes	☐No	☐N/A	
7	Structure/material (Construction, material)	☐Yes	☑No	☐N/A	
8	Functions (Semiconductor parts must include the functions)	☑Yes	☐No	☐N/A	
9	Microcomputer performance (Microcomputer products must include the CPU bus width (bit))	☐Yes	☐No	☑N/A	
10	Recommended circuit diagrams (Semiconductor parts must include a recommended circuit)	☐Yes	☐No	☑N/A	
11	Pattern diagrams of PCB (Semiconductor parts must include the PCB patterns)	☐Yes	☐No	☑N/A	
12	Environmental reliability warranty items (Anti-humidity, high/low temperature, thermal shock, life etc.)	☑Yes	☐No	☐N/A	
13	Operating temperature range	☑Yes	☐No	☐N/A	
14	Storage temperature range	☑Yes	☐No	☐N/A	
15	Packaging specification (Simple package structure illustration, taping dimensions, stick dimensions, packaged quantity etc.)	☑Yes	☐No	☐N/A	
16	Marking indication method	☐Yes	☑No	☐N/A	
17	Strage period after opening (Semiconductor parts must include the storage environment and storage period after opening)	☐Yes	☑No	☐N/A	
18	Precautions for use	☑Yes	☐No	☐N/A	
19	Temperature profile (Solder flow and reflow temperature profile)	☐Yes	☐No	☑N/A	
20	Failure rate (Exclude if it cannot be determined due to purchased item)	☐Yes	☑No	☐N/A	
21	Safty standards (Conforming standard information, UL/CSA, electricity safety law, PL law etc.)	☐Yes	☑No	☐N/A	
22	Process control chart	☐Yes	☑No	☐N/A	
23	Export control checklist (Survey checklist against the export control law)	☐Yes	☑No	☐N/A	
24	Items subject to advance discussions (Verify the statement that all changes to delivery specifications shall be notified in advance)	☑Yes	☐No	☐N/A	
25	Manufacture's evaluation test data	☐Yes	☑No	☐N/A	
26	Other materials determined necessary by the business unit	☐Yes	☑No	☐N/A	

	Disclosure/Non-disclosure (NDA, blanket contract, etc.)	☑Disclosure	☐Non-disclosure	
	Description of intellectual property right	☑No	☐Yes	

RECORD OF REVISION

Date	The upper section : Previous revision The lower section : New revision Sheet No.	Page	Summary
Jan.23,2009	IPS4PS 2611-AX080B052E-1	11-2/2	Added Rev.B Changed Optical Sheet
	IPS4PS 2611-AX080B052E-2	11-2/2	
May.14,2009	IPS4PS 2603-AX080B052E-2	3-1/1	Added Factory for IPS Alpha Technology, Ltd.(Mobara/Utsunomiya,Japan)
	IPS4PS 2603-AX080B052E-3	3-1/1	
	IPS4PS 2611-AX080B052E-2	11-1/2	Added Factory U :IPS Alpha Technology, Ltd.(Utsunomiya) Added Special mark Added Glass Maker B
	IPS4PS 2611-AX080B052E-3	11-1/3	
	IPS4PS 2611-AX080B052E-2	11-2/2	Added Rev.C,D,E,F,G,H,J,K,L Changed Optical Sheet and Tcon107
	IPS4PS 2611-AX080B052E-3	11-2/3	
	IPS4PS 2611-AX080B052E-2	—	Added samples of the product labels by production bases.
	IPS4PS 2611-AX080B052E-3	11-3/3	
Aug.21,2009	IPS4PS 2611-AX080B052E-3	11-2/3	Added Rev.M,N,P,Q,R,S,T,U,V,W,X :Changed Backlight and EEFL
	IPS4PS 2611-AX080B052E-4	11-2/3	
Oct.20,2009	IPS4PS 2611-AX080B052E-4	11-2/3	Added Rev.Y,Z :Added METCO Backlight ass'y.
	IPS4PS 2611-AX080B052E-5	11-2/3	

DESCRIPTION

The following specifications are applied to the following IPS-Pro-TFT LCD module.
Note : Inverter for backlight unit is not built in this module.

Product Name : AX080B052E

Product Factory : IPS Alpha Technology, Ltd. (Mobara/Utsunomiya,Japan)

General Specifications

Effective display area	: (H) 697.685 × (V) 392.256	(mm)
Number of pixels	: (H) 1,366 × (V) 768	(pixels)
Pixel pitch	: (H) 0.51075 × (V) 0.51075	(mm)
Color pixel arrangement	: R+G+B vertical stripe	
Display mode	: Transmissive mode Normally black mode	
Top polarizer type	: Semi-Glare	
Number of colors	: 16,777,216	(colors)
Viewing angle range	: Super wide version (Horizontal & vertical : 178°, CR≧10)	
Input signal	: 1-channel LVDS (LVDS : Low voltage differential signaling)	
Backlight	: 14 pcs. of EEFL (EEFL : External electrode fluoresent lamp)	
External dimensions	: Typ. (H) 760.0 × (V) 450.0 × (t) (43.0)	(mm)
Weight	: Typ. 7,000	(g)

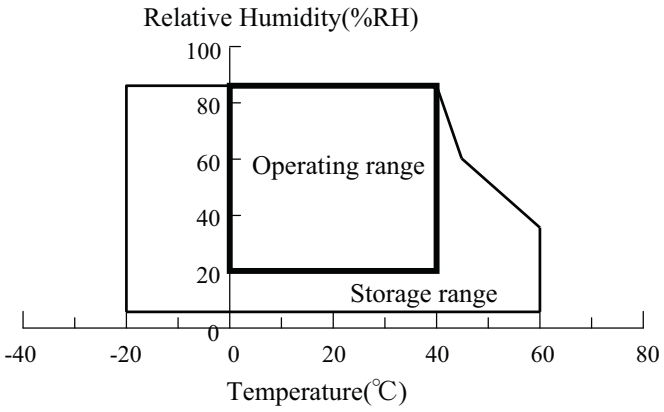
1. ABSOLUTE MAXIMUM RATINGS

1. 1 Environmental Absolute Maximum Ratings

ITEM	Operating		Storage		UNIT	NOTE
	Min.	Max.	Min.	Max.		
Temperature	0	50	-20	60	℃	1),5),6)
Humidity	2)		2)		%RH	1)
Vibration	-	4.9(0.5 G)	-	14.7(1.5 G)	m/s^2	3)
Shock	-	29.4(3 G)	-	294(30 G)	m/s^2	4)
Corrosive Gas	Not Acceptable		Not Acceptable		-	
Illumination at LCD Surface	-	50,000	-	50,000	1x	

Note 1) Temperature and Humidity should be applied to the glass surface of a IPS-Pro TFT LCD module, not to the system installed with a module.
The brightness of a EEFL tends to drop at low temperature. Besides, the life-time becomes shorter at low temperature.

2) Ta≦40 ℃ · · · · · · Relative humidity should be less than 85 %RH max. Dew is prohibited.
Ta＞40 ℃ · · · · · · Relative humidity should be lower than the moisture of the 85 %RH at 40 ℃.



3) Frequency of the vibration is between 15 Hz and 100 Hz. (Remove the resonance point) 1 hour.
4) Pulse width of the shock is 10 ms.
5) Long operation under low temperature may cause some portion of display area to be reddish for several minutes after turning on the product.
However, it does not affect the characteristics and reliability of the product.
6) The temperature of LCD front surface would be 65 ℃ in operating, it may affect the optical characteristics however it does not damage the function of the module.

1. 2 Electrical Absolute Maximum Ratings

(1)TFT-LCD module V_{SS} = 0 V

ITEM	SYMBOL	Min.	Max.	UNIT	NOTE
Power Supply Voltage	V_{DD}	0	13.2	V	
Input Voltage for logic	V_I	-0.3	4.0	V	1)
Electrostatic Durability	V_{ESD0}	±100		V	2),3)
	V_{ESD1}	±20		kV	2),4)

Note 1) It is applied to pixel data signal and clock signal.
2) Discharge Coefficient : 250 pF - 100 Ω, Environmental : 25 ℃ - 70%RH
3) It is applied to I/F connector pins.
4) It is applied to the surface of a metallic bezel and a LCD panel.

(2) Backlight unit GND = 0 V

ITEM	SYMBOL	Min.	Max.	UNIT	NOTE
Input current	I_L	-	8.0	mArms	1)
Input voltage	V_L	-	(1,500)	Vrms	2)

Note 1) The specification shall be applied to each EEFL. The specification is defined at ground line.

2) The specification shall be applied at connector pins for a EEFL at start-up.

2. INITIAL OPTICAL CHARACTERISTICS

The following optical characteristics are measured under stable conditions. It takes about 30 minutes to reach stable conditions. The measuring point is the center of display area unless otherwise noted.

The optical characteristics should be measured in a dark room or equivalent state.

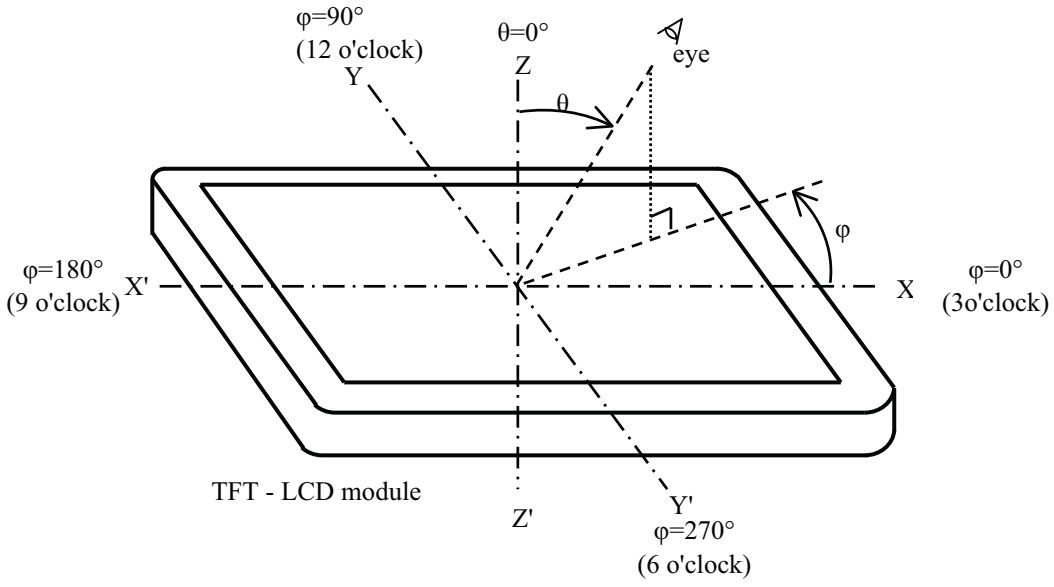
Measuring equipment : CS-1000A, or equivalent

Ambient Temperature =25 ℃ , V_{DD}=12.0 V , f V=60 Hz ,

I_L=7mArms (On duty 70%)

ITEM		SYMBOL	CONDITION	Min.	Typ.	Max.	UNIT	NOTE
Contrast ratio		CR	θ= 0 ° 1)	700	1200	-	-	2)
Response time	Rise	ton		-	8	20	ms	3)
	Fall	toff		-	6	20	ms	3)
Brightness of white		Bwh		350	450	-	cd/m^2	
Brightness uniformity		Buni		-	-	30	%	4)
Color chromaticity (CIE)	Red	x		0.56	0.59	0.62	-	【Gray scale =255】
		y		0.29	0.32	0.35		
	Green	x		0.28	0.31	0.34		
		y		0.55	0.58	0.61		
	Blue	x		0.12	0.15	0.18		
		y		0.04	0.07	0.10		
	White	x		0.248	0.278	0.308		
		y		0.250	0.280	0.310		
Variation of color position (CIE)	Red	Δx	θ= 50 ° φ= 0 °, 90 °, 180 °, 270 ° 1)	-	-	0.04	-	5) 【Gray scale =255】
		Δy		-	-	0.04		
	Green	Δx		-	-	0.04		
		Δy		-	-	0.04		
	Blue	Δx		-	-	0.04		
		Δy		-	-	0.04		
	White	Δx		-	-	0.04		
		Δy		-	-	0.04		
Contrast ratio at 89 °		CR89	6)	10	-	-	-	Estimated value
Image sticking		-	Mosaic pattern	Invisible			-	7)

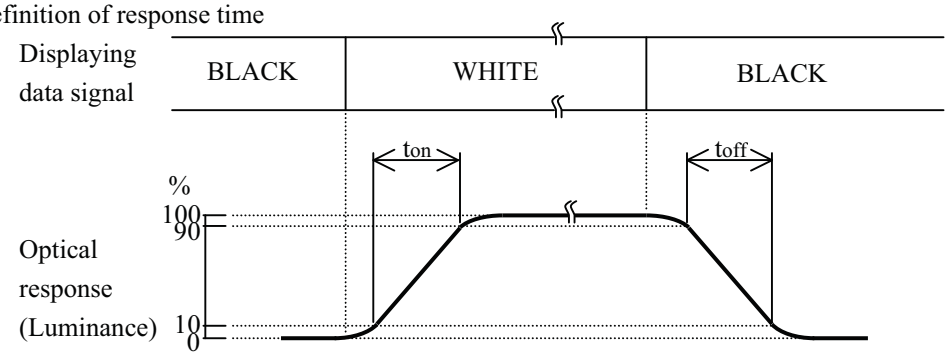
Note 1) Definition of viewing angle



Note 2) Definition of contrast ratio (CR)

$$CR = \frac{\text{(Luminance at displaying WHITE)}}{\text{(Luminance at displaying BLACK)}}$$

3) Definition of response time



4) Definition of brightness uniformity

Display pattern is white (255 level) . The brightness uniformity is defined as the following equation. Brightness at each point is measured, and average, maximum and minimum brightness is calculated.

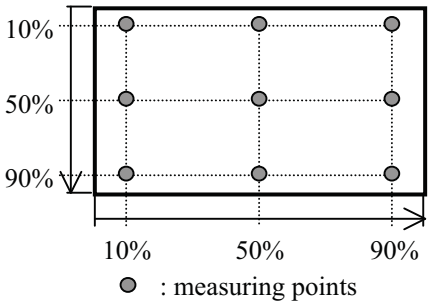
$$B_{uni} = \frac{\left| B_{max} \text{ or } B_{min} - B_{ave} \right|}{B_{ave}} \times 100$$

where, B_{max} = Maximum brightness

B_{min} = Minimum brightness

B_{ave} = Average brightness

$$B_{ave} = \frac{\sum_{k=1}^{9} (B(k))}{9}$$



5) Variation of color position on CIE

Variation of color position on CIE is defined as difference between colors at θ= 0° and at θ= 50°& φ= 0°, 90°, 180°, 270°.

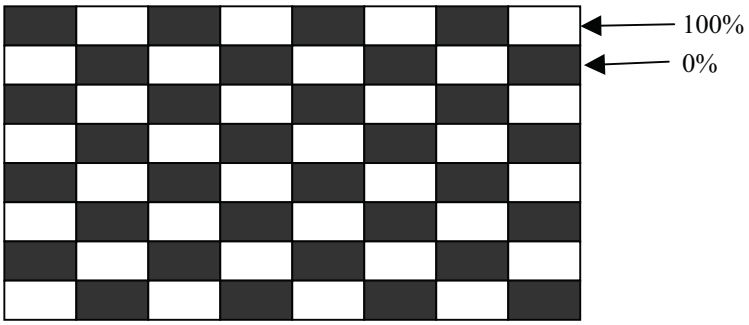
6) Contrast ratio at 89 °

Evaluetion conditions are on horizontal & vertical axis

7) Image sticking

Condition : Operating mosaic pattern for 2 hours and gray scale (22 %) for 1 hour.

Mosaic pattern



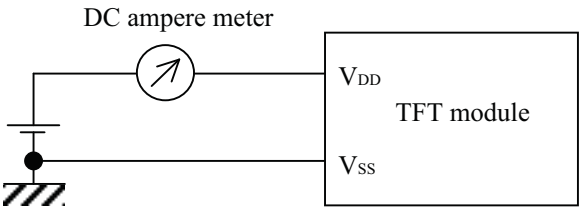
3. ELECTRICAL CHARACTERISTICS

3. 1 TFT-LCD module

Ta = 25 ℃ , V_{SS} = 0 V

ITEM	SYMBOL	Min.	Typ.	Max.	UNIT	NOTE
Power supply voltage	V_{DD}	11.4	12.0	12.6	V	
Power supply current	I_{DD}	-	0.4	0.7	A	1),2)
Ripple voltage of power supply	V_{DDR}	-	-	350	mV	

Note 1) f_V=60.0Hz, f_{CLK}=85MHz, V_{DD}=12.0V, and display pattern is white raster.



2) Current fuse is built in a module. Current capacity of power supply for V_{DD} should be larger than 4A, so that the fuse can be opened at the trouble of electrical circuit of module.

3. 2 Back light unit

Ta = 25 ℃ , V_{SS} = 0 V

ITEM		SYMBOL	Min.	Typ.	Max.	UNIT	NOTE
Input current		I_L	-	7.0	7.5	mArms	1)
Input voltage		V_L	-	810	870	Vrms	I_L=7mArms (duty100%)
Established starting voltage	at 25℃	V_S	-	-	820	Vrms	
	at 0℃		-	-	985	Vrms	
Output frequency		f	55.0	57.0	58.0	kHz	2)
EEFL life time		-	50,000	60,000	-	hours	3)

Note 1) The specification shall be applied to each EEFL. The specification is defined at frame ground.

2) Frequency of power supply for EEFLs may cause the interference with IMAGE freqency and cause beat or flicker on the display. Therefore, it is recommended to configure EEFL frequency that does not cause interference.

3) Life time of a lamp is defined. The life is determined as the time at which brightness of the lamp is 50 % compared to that of initial value at that typical lamp current on condition of continuous operating at 25 ± 2 ℃, IL = 7mArms (Duty 100%).

Note 1) Definition of gray scale :

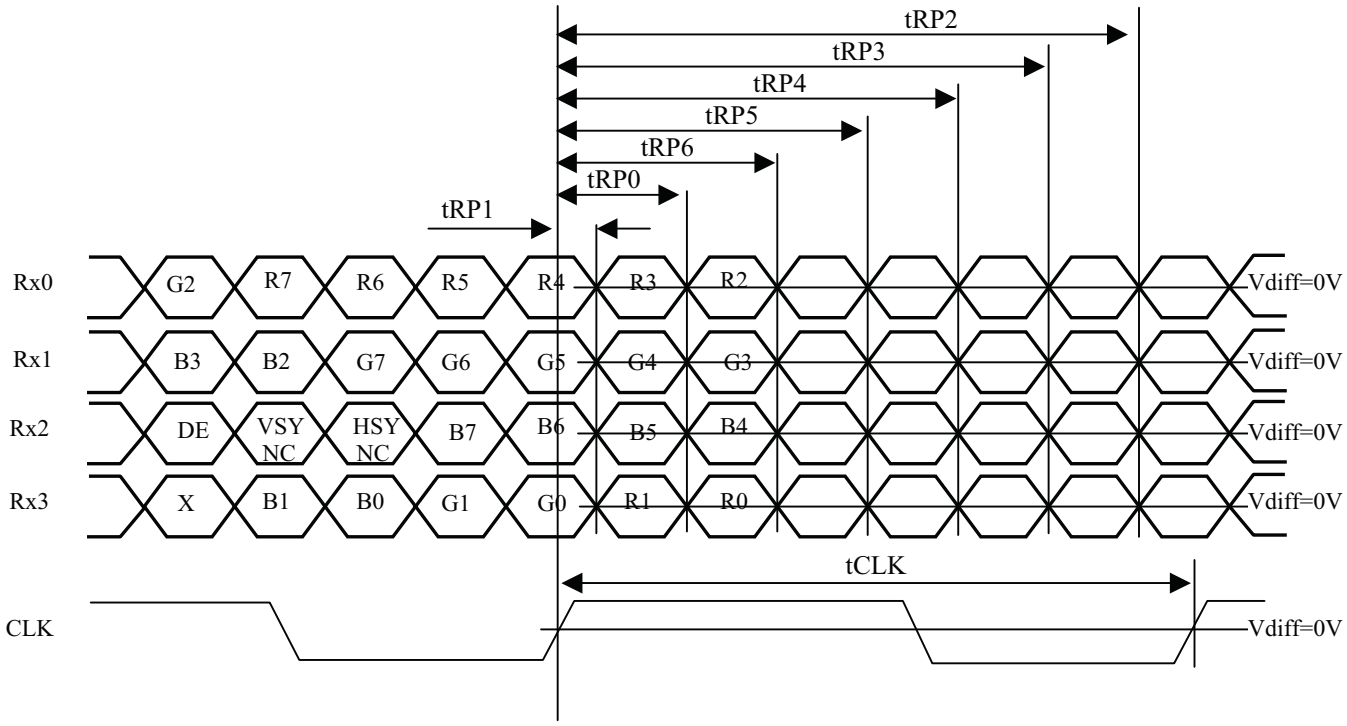
Color(n)・・・・Number in parenthesis indicates gray scale level.

Larger n correspondsto brighter level.

2) Data : 1 : High, 0 : Low

6. INTERFACE TIMING

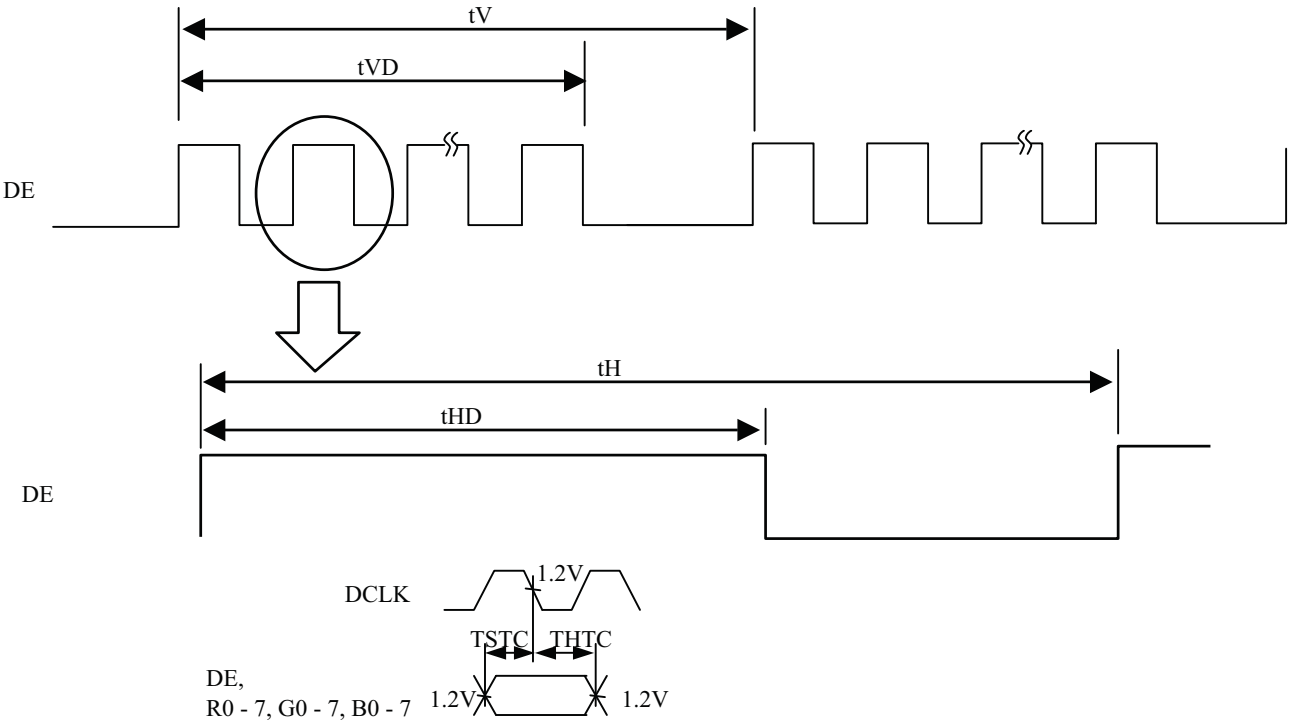
6. 1 LVDS receiver timing



Rx0=(Rx0+)-(Rx0-)
Rx1=(Rx1+)-(Rx1-)
Rx2=(Rx2+)-(Rx2-)
Rx3=(Rx3+)-(Rx3-)
CLK=(CLK+)-(CLK-)

ITEM		SYMBOL	Min.	Typ.	Max.	UNIT	NOTE
CLK	Frequency (at 50 Hz)	DCLK	68	78	87	MHz	=1/tclk
	Frequency (at 60 Hz)		78	85	87	MHz	=1/tclk
	CLK Skew	tSC	- 4.0	0	+ 4.0	ns	
Rx*0 Rx*1 Rx*2 Rx*3	0 data position	tRP0	1/7tCLK - 0.4	1/7tCLK	1/7tCLK + 0.4	ns	
	1st data position	tRP1	- 0.4	0	+ 0.4		
	2nd data position	tRP2	6/7tCLK - 0.4	6/7tCLK	6/7tCLK + 0.4		
	3rd data position	tRP3	5/7tCLK - 0.4	5/7tCLK	5/7tCLK + 0.4		
	4th data position	tRP4	4/7tCLK - 0.4	4/7tCLK	4/7tCLK + 0.4		
	5th data position	tRP5	3/7tCLK - 0.4	3/7tCLK	3/7tCLK + 0.4		
	6th data position	tRP6	2/7tCLK - 0.4	2/7tCLK	2/7tCLK + 0.4		

6. 2 Syncronization signal timing



Note 1) Reference level for each timing signal is 1.2 V unless it is stated on the chart, high level voltage(VIH) and low level voltage(VIL) are defined as follows:

VIH ≧ 2.0 V VIL ≦ 0.8 V

2) The timing of DCLK to other signals conforms to the specifications of LVDS transmitter.

I)50Hz

ITEM		SYMBOL	Min.	Typ.	Max.	UNIT	NOTE
DE	Vertical frequency	fV	48	50	52	Hz	
	Vertical period	tV	773	860	1000	tH

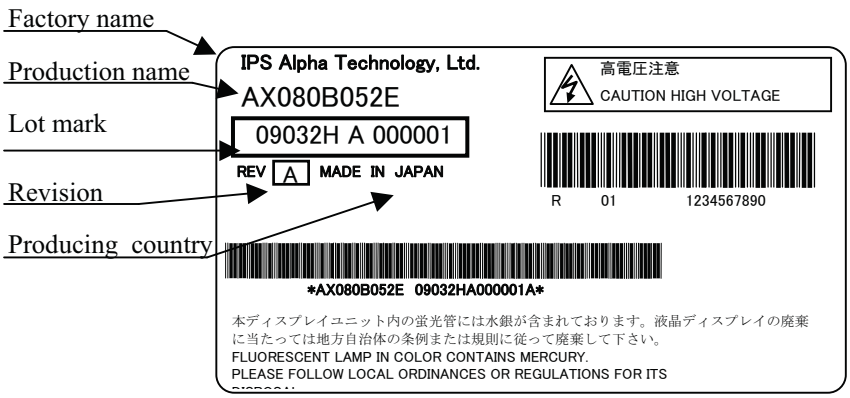
8.5 Samples of the product labels by production bases



Product by IPS Alpha Technology, Ltd. (Mobara)

Product by IPS Alpha Technology, Ltd.(Utsunomiya)

9. COSMETIC SPECIFICATIONS

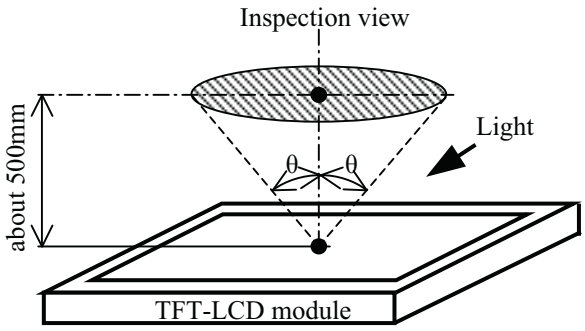
9.1 Condition for cosmetic inspection

(1) Viewing zone

a) The figure shows the correspondence between eyes (of inspector) and TFT-LCD module.

θ≦45° : when non-operating inspection

θ≦5° : when operating inspection



b) Inspection should be executed only from front side and only A-zone.
Cosmetic of B-zone and C-zone are ignore.
(refer to 9.2 Definition of zone)

(2) Environmental

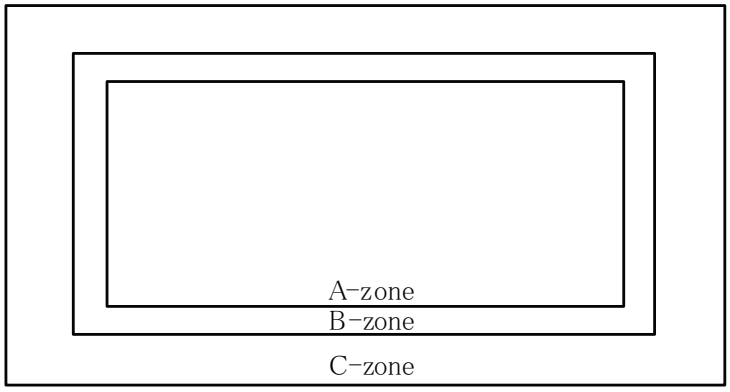
a) Temperature : 25 degrees

b) Ambient light : about 700 lx and non-directive when operating inspection.
: about 1000 lx and non-directive when non-operating inspection.

c) Backlight : when non-operating inspection, backlight should be off .

9.2 Definition of zone

・A-zone : Display area (pixel area)
・B-zone : Area between A-zone and C-zone
・C-zone : Metallic bezel area



9.3 Cosmetic specifications

When displaying conditions are not stable (ex. at turn on or off), the following specifications are not applied.

	No	ITEM			Max. acceptable number		Unit	Note
					Bright defect	Low bright defect		
Operating inspection	1	Dot defect	Sparkle mode	1-dot	0	4	pcs	1),2),4)
				2-dots	0		Units	1),2),5)
				3-dots	0			
				Density	0		pcs/φ20mm	1),2),6)
				Total	4		pcs	1),2)
			Black mode	1-dot	7		pcs	1),3),4)
				2-dots	0		Units	1),3),5)
				3-dots	0			
				Density	3		pcs/φ20mm	1),3),6)
				Total	7		pcs	1),3)
				Total	9		pcs	1)
	2	Line defect			Serious one is not allowed		-	-
	3	Uneven brightness						

	No	ITEM			Max. acceptable number		Unit	Note
					Bright defect	Low bright defect		
Operating inspection	4	Stain inclusion (Line shape, W : width (mm), L : length (mm))	W≦0.02	L : Ignore	Ignore		pcs	7)
			W≦0.04	L≦4.0	8			
				L>4.0	0			
			W≦0.08	L≦2.0	8			
				L>2.0	0			
			W>0.08	-	(See dot shape)			
	5	Stain inclusion (Dot shape, D : ave. dia (mm))	D≦0.22		Ignore		pcs	7)
			D≦0.5		8			
			D>0.5		0			
	6	Scratch on polarizer (Line shape, W : width (mm), L : length (mm))	W≦0.02	L : Ignore	Ignore		pcs	8)
			W≦0.08	L≦20	10			
				L>20	0			
			W>0.08	-	0			
	7	Scratch on polarizer (Dot shape, D : ave. dia (mm))	D≦0.2		Ignore		pcs	8)
			D≦0.6		10			
			D>0.6		0			
Non operating inspection	8	Bubbles, peeling in polarizer (D : ave. dia (mm))	D≦0.2		Ignore		pcs	8)
			D≦0.5		10			
			D>0.5		0			
	9	Wrinkles on polarizer			Serious one is not allowed.		-	-

Note 1) Dot defect : defect area > 1/2 dot

2) Sparkle mode :

bright defect	G>24.3%
	R>24.3%
	B>24.3%
low bright defect	24.3%≧G>4.1%
	24.3%≧R>7.8%
	24.3%≧B>18.0%

3) Black mode : brightness of dot is less than 70% at white. (visible to eye)

4) 1 dot : defect dot is isolated, not attached to other defect dot.

5) N dots : N defect dots are consecutive. (N means the number of defects dots)

6) Density : number of defect dots inside φ20mm

7) Those stains which can be wiped out easily are acceptable.

8) Polarizer area inside of B-zone is not applied.

9) No major (serious) defects when viewed in gray scale mode.

10. PRECAUTION

Please pay attention to the followings when a TFT module with a back-light unit is used, handled and mounted.

10.1 Precaution to handling and mounting

(1) Applying strong force to a part of the module may cause partial deformation of frame or mold, and cause damage to the display.

(2) The module should gently and firmly be held by both hands. Never hold by just one hand in order to avoid any internal damage. Never drop or hit the module.

(3) The module should be installed with mounting holes of a module.

(4) Uneven force such as twisted stress should not be applied to a module when a module is mounted on the cover case. The cover case must have sufficient strength so that external force can not be transmitted directly to a module.

(5) It is recommended to leave a space between a module and a holding board of a module so that partial force is not applied to a module.

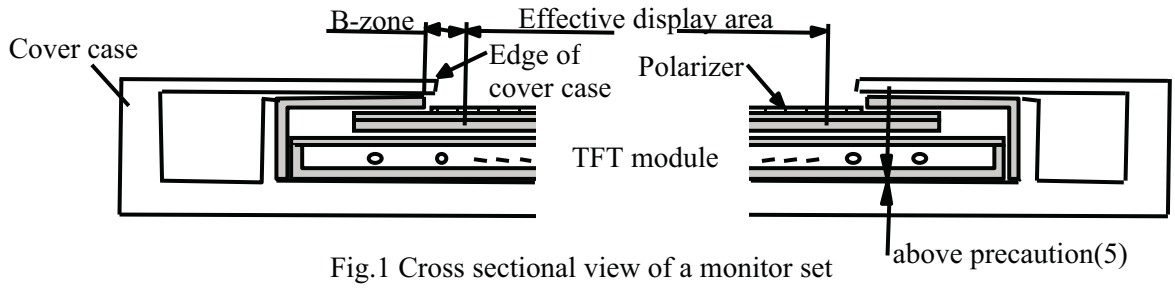


Fig.1 Cross sectional view of a monitor set

(6) The edge of a cover case should be located inside more than 1mm from the edge of a module front frame.

(7) A transparent protective plate should be added on the display area of a module in order to protect a polarizer and TFT cell.The transparent protective plate should have sufficient strength so that the plate can not touch a module by external force.

(8) Materials included acetic acid and choline should not be used for a cover case as well as other parts and boards near a module. Acetic acid attacks a polarizer. Choline attacks electric circuits due to electro-chemical reaction.

(9) The polarizer on a TFT cell should carefully be handled due to its softness, and should not be touched, pushed or rubbed with glass, tweezers or anything harder than HB pencil lead. The surface of a polarizer should not be should be stored in the IPS Alpha's shipping box.

(10) The surface of a polarizer should be gently wiped with absorbent cotton, chamois or other soft materials slightly contained petroleum benzene when the surface becomes dirty. Normal-hexane or Isopropyl alcohol as cleaning chemicals is recommended in order to clean adhesives which fix front/rear polarizers on a TFT cell. Other cleaning chemicals such as acetone, toluen and alcohol should not be used to clean adhesives because they cause chemical damage to a polarizer.

(11) Saliva or water drops should be immediately wiped off. Otherwise, the portion of a polarizer may be deformed and its color may be faded.

(12) The module should not be opened or modified. It may cause not to operate properly.

(13) Metallic bezel of a module should not be handled with bare hand or dirty gloves. Otherwise, color of a metallic frame may become dirty during its storage. It is recommended to use clean soft gloves and clean finger stalls when a module is handled at incoming inspection process and production (assembly) process.

(14) Lamp(EEFL) cables should not be pulled and held.

10.2 Precaution to operation

(1) The ambient temperature near the operated module should be satisfied with the absolute maximum ratings. Unless it meets the specifications, sufficient cooling system should be adopted to system.

(2) The spike noise causes the mis-operation of a module. The level of spike noise should be as follows:

$$-200mV \leqq \text{over- and under- shoot of VDD} \leqq +200mV$$

VDD including over- and under- shoot should be satisfied with the absolute maximum ratings.

(3) Optical response time, luminance and chromaticity depend on the temperature of a TFT module. Response time and saturation time of EEFL luminance become longer at lower temperature operation.
(4) Sudden temperature change may cause dew on and/or in the a module. Dew males damage to a polarizer and/or electrical contacting portion. Dew causes fading of displayed quality.
(5) Fixed patterns displayed on a module for a long time may cause after-image. It will be recovered soon.
(6) A module has high frequency circuits. Sufficient suppression to electromagnetic interference should be done by system manufacturers. Grounding and shielding methods may be effective to minimize the interference.
(7) Noise may be heard when a back-light is operated. If necessary, sufficient suppression should be done by system manufacturers.
(8) The module should not be connected or removed while a main system works.
(9) Inserting or pulling I/F connectors causes any trouble when power supply and signal dates are on-state. I/F connectors should be inserted and pulled after power supply and signal dates are turned off.

10.3 Electrostatic discharge control

(1) Since a module consists of a TFT cell and electronic circuits with CMOS-ICs, which are very weak to electrostatic discharge, persons who are handling a module should be grounded through adequate methods such as a list band. I/F connector pins should not be touched directly with bare hands.
(2) Protection film for a polarizer on a module should be slowly peeled off so that the electrostatic charge can be minimized.

10.4 Precaution to strong light exposure

(1) A module should not be exposed under strong light. Otherwise, characteristics of a polarizer and color filter in a module may be degraded.

10.5 Precaution to storage

When modules for replacement are stored for a long time, following precautions should be taken care of:
(1) Modules should be stored in a dark place. It is prohibited to apply sunlight or fluorescent light during storage. Modules should be stored at 0 to 35°C at normal humidity (60%RH or less).
(2) The surface of polarizers should not come in contact with any other object. It is recommended that modules should be stored in the IPS Alpha's shipping box.

10.6 Precaution to handling protection film

(1) The protection film for polarizers should be pealed off slowly and carefully by persons who are electrically grounded with adequate methods such as a list band. Besides, ionized air should be blown over during peeling action. Dusts on a polarizer should be blown off by an ionized nitrogen gun and so on.
(2) The protection film should be peeling off without rubbing it to the polarizer. Because, if the film is rubbed together with the polarizer, since the film is attached to the polarizer with a small amount of adhesive, the adhesive may remain on a polarizer.
(3) The module with protection film should be stored on the conditions explained in 10.5 (1). However, in case that the storage time is too long, adhesive may remain on a polarizer even after a protection film is peeled off. Besides, in case that a module is stored at higher temperature and/or higher humidity, adhesive may remain on a polarizer. The remained adhesive may cause non-uniformity of display image.
(4) The adhesive can be removed easily with Normal-Hexane or Isopropyl alcohol. The remained adhesive or its vestige on the polarizer should be wiped off with absorbent cotton or other soft materials such as chamois slightly contained Normal-Hexane or Isopropyl alcohol.

10.7 Safety

(1) Since a TFT cell and lamps are made of glass, handling to the broken module should be taken care sufficiently in order not to be injured. Hands touched liquid crystal from a broken cell should be washed sufficiently.

(2) The module should not be taken apart during operation so that backlight drives by high voltage.

10.8 Environmental protection

(1) The TFT module contains cold cathode fluorescent lamps. Please follow local ordinance or regulations for its disposal.

(2) Flexible printed circuits and printed circuits board used in a module contain small amount of lead. Please follow local ordinance or regulations for its disposal.

10.9 Use restrictions and limitations

(1) This product is not authorized for use in life support devices or systems, military applications or other applications which pose a significant risk of personal injury.

(2) In no event shall IPS Alpha Technology, Ltd., be liable for any incidental, indirect or consequential damages in connection with the installation or use of this product, even if informed of the possibility thereof in advance. These limitations apply to all causes of action in the aggregate, including without limitation breach of contact, breach of warranty, negligence, strict liability, misrepresentation and other torts.

10.10 Precaution to setting inverter

(1) Please use inverter output waveform that satisfies following formulae.

$0.9*\sqrt{2}*Irms < |Ip| < 1.1*\sqrt{2}*Irms$

$0.9*\sqrt{2}*Irms < |I\text{-}p| < 1.1*\sqrt{2}*Irms$

Ip Peak value of lamp current at positive side

I-p Peak value of lamp current at negative side

Also, please use sine wave with symmetric positive and negative wave that both area and peak of IL and VL waveforms are within 10% of asymmetry rate, and that do not develop spike wave. Otherwise there is a possibility to develop lighting defect.

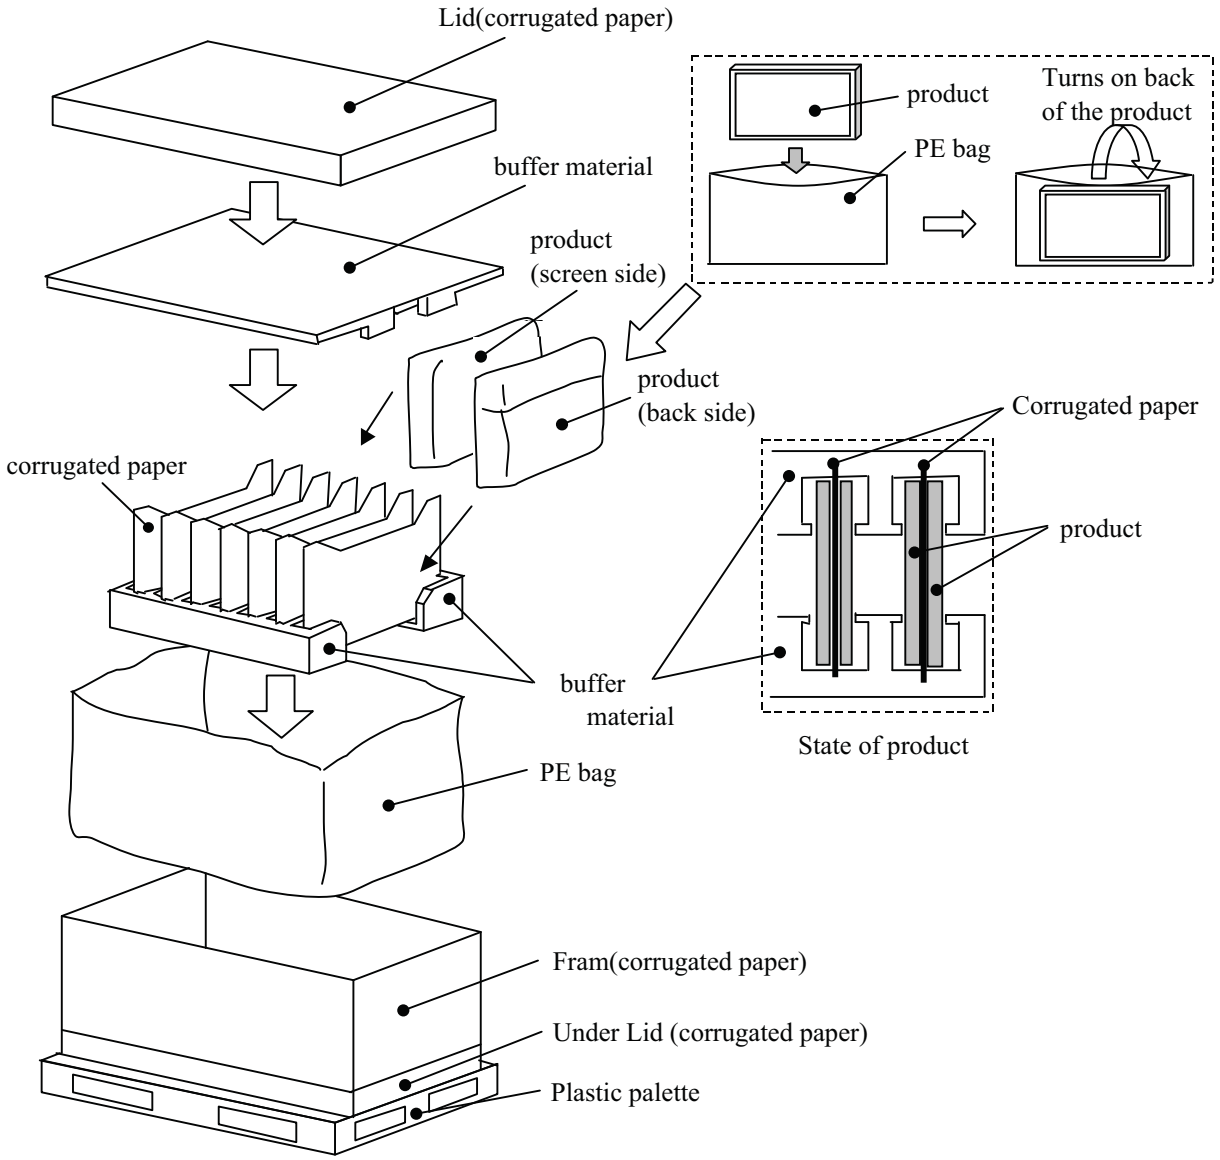
(2) After this product is stored for a long time, it might take longer to discharge lamp. It is recommended that auxiliary illuminant (LED, etc.) is set.

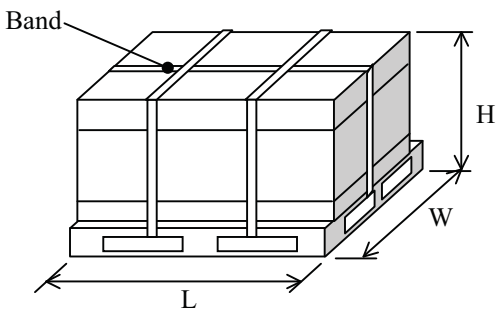
(3) Since multiple lamps are closely-mounted to the back-light, please use inverter that output waveform is synchronized. If different phase inverter is used, it might cause luminance depression or short life span by phase difference.

10.11 Others

Electrical components which may not affect electrical performance are subjective to change without notice because of their availability.

11.Packing





Size : 1210(L) × 1000(W) × 675(H)mm
