NEW PRODUCT

AZ1117E

1.0A LOW DROPOUT LINEAR REGULATOR

Description

The AZ1117E is a low dropout three-terminal regulator with 1.0A output current ability, and the dropout voltage is specified at typical 1.1V at 1.0A current load, decreasing at lower load currents.

The AZ1117E has been optimized for low voltage where transient response and minimum input voltage are critical. It provides current limit and thermal shutdown protection solutions. Its circuit includes a trimmed band gap reference to assure output voltage accuracy to be within ±1%. On-chip thermal shutdown provides protection against a combination of high current and ambient temperature that would create excessive junction temperature.

The AZ1117E is available in 1.2V, 1.5V, 1.8V, 2.5V, 3.3V and 5.0V fixed output voltage versions and ADJ output voltage version. The fixed versions integrate the adjust resistors.

The AZ1117E is available in the industry-standard SOT-223 package.

Applications

- TVs and LCD Monitors
- PC Peripherals: Notebooks, Motherboards
- STB

Pin Assignments

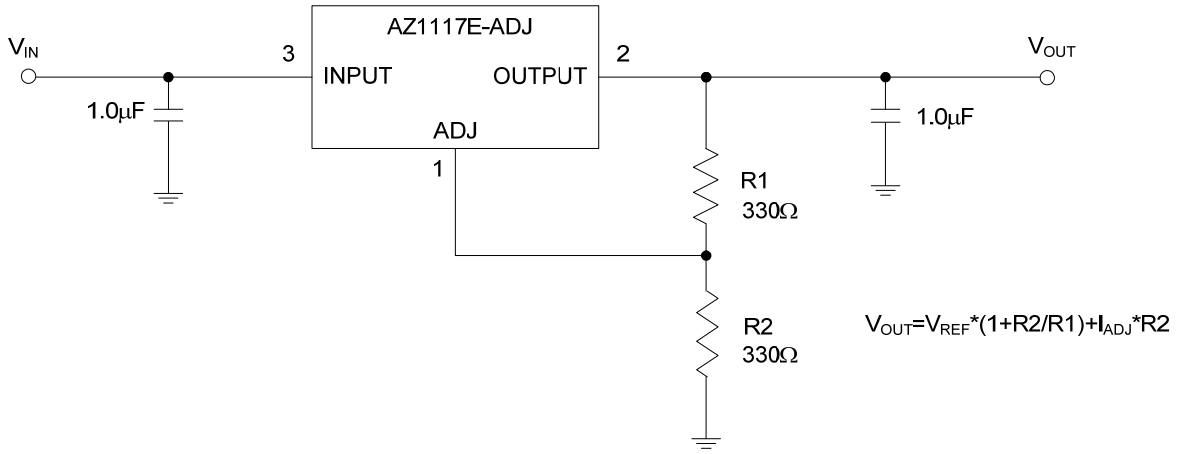
SOT-223

Features

- Provide ADJ Version (V_{REF} = 1.25V) and Fixed Voltage 1.2V, 1.5V, 1.8V, 2.5V, 3.3V and 5.0V with Accuracy ±1% (Except 1.2V)
- Current Limit: 1.3A (Typ.)
- Dropout Voltage: 1.1V (Typ.) @I_{OUT} = 1A
- Regulator Stable with Low ESR MLCC
- Excellent Line Regulation: 0.001%/V (Typ.) @ I_{OUT} = 30mA
- Excellent Load Regulation: 0.2%/A @I_{OUT} = 1A
- Quiescent Current: 3.5mA
- Low Output Noise
- PSRR: 70dB
- OTSD Protection
- Operation Junction Temperature: -40°C to +125°C
- **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3**)

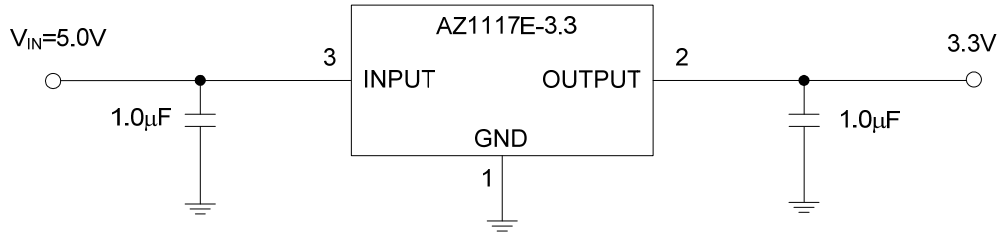
Notes:
1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
2. See http://www.diodes.com/quality/lead_free.html for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Typical Applications Circuit (Note 4)



NEW PRODUCT

Typical Applications Circuit (Cont. Note 4)



Note 4: The AZ1117E is compatible with Low ESR ceramic capacitor.
A minimum of 1.0μF input and output capacitors are required.
The ESR of the output capacitors must be less than 1.5Ω.
Close to the OUTPUT pin, it is not recommended to use a capacitor smaller than 0.68μF in parallel with output capacitor.
When the output capacitor parallels 0.1μF capacitor, the 0.1μF capacitor must be away from the OUTPUT pin, the distance is no less than 5mm.

Pin Descriptions

Pin Number	Pin Name	Function
1	ADJ/GND	Adjustable pin or ground pin
2	OUTPUT	Regulator output pin
3	INPUT	Supply voltage pin

Absolute Maximum Ratings (Note 5)

Symbol	Parameter	Rating	Unit
V_{IN}	Power Supply Voltage	16	V
T_J	Operating Junction Temperature Range	+150	ºC
T_{STG}	Storage Temperature Range	-65 to +150	ºC
T_{LEAD}	Lead Temperature (Soldering, 10sec)	+260	ºC
θ_{JA}	Thermal Resistance (Junction to Ambient) (Note 6)	65	ºC/W
–	ESD (Machine Model)	200	V
–	ESD (Human Body Model)	2000	V

Notes: 5. Stresses greater than those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “Recommended Operating Conditions” is not implied. Exposure to “Absolute Maximum Ratings” for extended periods may affect device reliability.
6. Chip is soldered to 200mm^2(16mm*12.5mm) copper (top side solder mask) on 2oz.2 layers FR-4 PCB with 8*0.5mm vias.

Recommended Operating Conditions

Symbol	Parameter	Min	Max	Unit
V_{IN}	Supply Voltage	–	13	V
T_J	Operating Junction Temperature Range	-40	+125	ºC

NEW PRODUCT

Electrical Characteristics (@V_{IN} = V_{OUT}+1.5V, C_{IN} = 1.0μF (Ceramic), C_{OUT} = 1.0μF (Ceramic), Typical T_A = +25°C, **Bold** typeface applies over -40°C ≤ T_J ≤ +125°C ranges, unless otherwise specified.)

Symbol	Parameter	Conditions		Min	Typ	Max	Unit

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
