

## 1.SCOPE

The SAW filter series have broad line up products meeting all broadcast standard including NTSC, PAL and SECAM systems. These filters are composed of two interdigital transducers on a single-crystal piezoelectrical chip. They are used in electronic equipments such as TV and so on.

### 3.Characteristics

#### Standard atmospheric conditions

Unless otherwise specified , the standard rang of atmospheric conditions for making measurements and tests is as follows;

Ambient temperature : 15C to 35C

Relative humidity : 25% to 85%

Air pressure : 86kPa to 106kPa

#### Operating temperature rang

Operating temperature rang is the rang of ambient temperatures in which the filter can be operated continuously. -10C ~ +60C

#### Storage temperature rang

Storage temperature rang is the rang of ambient temperatures at which the filter can be stored without damage.

Conditions are as specified elsewhere in these specifications. -40C ~ +70C

Reference temperature                    +25C
