

## 1.SCOPE

SAW filter series have broad line up products meeting all broadcast standard including NTSC,PAL and SECAM systems. These filters are composed of two interdigital transducers on a single-crystal piezoelectrical chip. They are used in electronic equipments such as TV and so on.

### **3.Characteristics**

## **Standard atmospheric conditions**

Unless otherwise specified, the standard range of atmospheric conditions for making measurements and tests is as follows:

Ambient temperature : 15 to 35

Relative humidity : 25% to 85%

Air pressure : 86kPa to 106kPa

## Operating temperature range

Operating temperature range is the range of ambient temperatures in which the filter can be operated continuously. -10 ~ +60

#### Storage temperature range

Storage temperature range is the range of ambient temperatures at which the filter can be stored without damage.

Conditions are as specified elsewhere in these specifications. -40 ~ +70
