

AC / DC converter

BP5034D15

The BP5034D15 is an AC / DC converter which can be used to supply +15, 80mA DC output from a commercial power supply (100V AC). Using this module, enables simple, easy drive of microcomputers, DC motors, heaters, LEDs, and other electronic components without using a transformer. It also allows set PCBs to be kept compact and lightweight, with extremely few attachments.

● Applications

Power supply circuit for vacuum cleaners, washing machines, refrigerators, electric rice cookers and crock pots, and other small household appliances, as well as power supply circuit for gas, fire and smoke alarms, DC motors, sensors, and other similar devices

● Features

- 1) Elimination of a transformer enables compact, lightweight power supply boards.
- 2) Wide input voltage range. (80 to 138V for AC voltage conversion)
- 3) DC power supplies can be easily configured, with few attachments.
