

MIL-STD-1553 TRANSCEIVER

DESCRIPTION

The BUS-1553 Transceiver is a complete transmitter and receiver which fully conforming to MIL-STD-1553A and 1553B. Features of this high reliability transceiver include: Harris 15530 type Encoder/Decoder direct interface compatibility, ± 15 V or +15 and -12 V power supply requirements, and an internal (factory pre-set) threshold level.

The block diagram, FIGURE 1, illustrates the BUS-8553 Transceiver. The receiver section accepts phase-modulated bipolar data from a MIL-STD-1553 Data Bus and produces TTL signal data at outputs: RX Data Out and RX Data In. These outputs represent positive and negative excursions of the input bus signals beyond a preset threshold level. The receiver can be taken off-line (outputs disabled) by applying a logic "0" to the RECEIVER STROBE input.

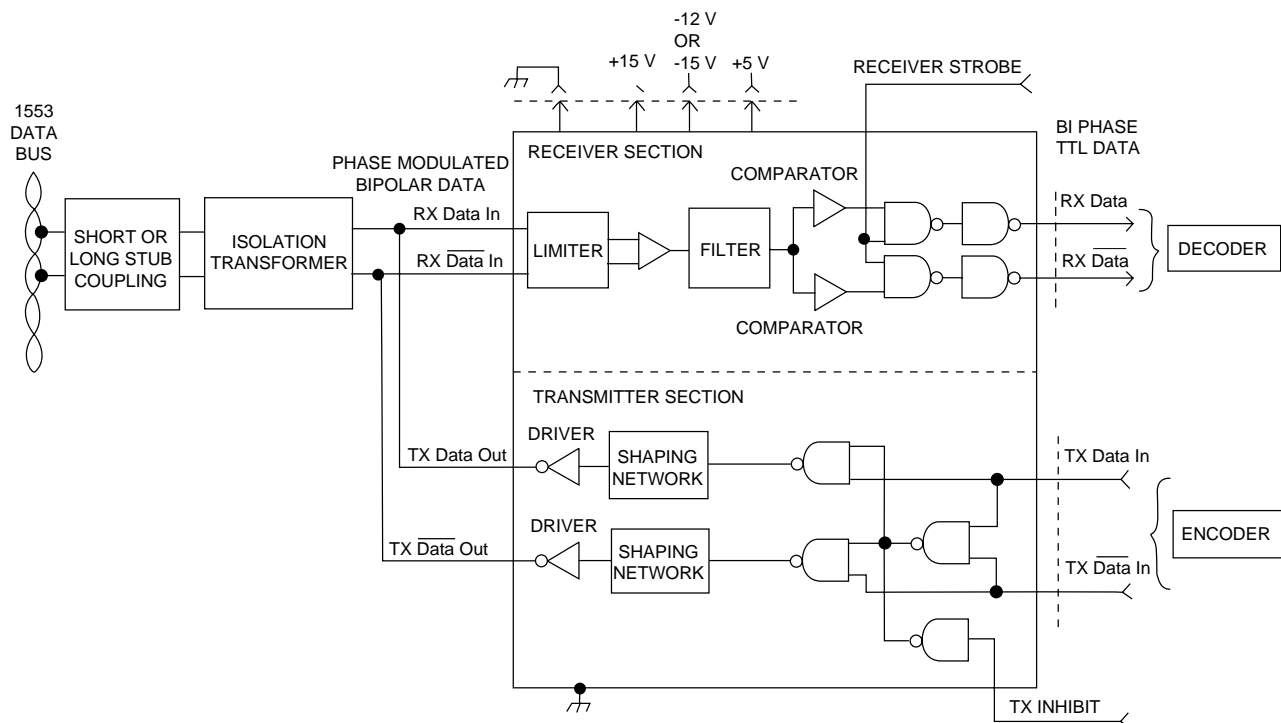

The transmitter section accepts bipolar TTL signal data at its TX Data and TX Data input lines and produces a 28 V pk-pk differential signal across a 140 Ω load that is coupled through a transformer to the TX Data and TX Data outputs. An external TX INHIBIT, when activated with a logic "1" will take the transmitter off-line and ignore the data inputs

APPLICATION

The BUS-8553s small size, low power dissipation, and direct interface compatibility with Harris 15530 type Encoder/Decoder makes it an excellent choice for any MIL-STD-1553A or 1553B transceiver application. The BUS-8553 comes in a hermetic 24-pin DDIP package that measures 1.4 x 0.8 x 0.2 inches.

FEATURES

- Meets All MIL-STD-1553A and 1553B Requirements
- Very Low Power Dissipation
- Improved Receiver Filtering Enhances System Bit Error Rate
- HARRIS 15530 Encoder/Decoder Direct Interface Compatibility
- Screened to MIL-PRF-38534
- Power Supplies:
 ± 15 V or
 $+15$ V and -12V

BUS-8553 MECHANICAL OUTLINE

ORDERING INFORMATION

BUS-8553-XX0X

Supplemental Process Requirements:

- S = Pre-Cap Source Inspection
- L = Pull Test
- Q = Pull Test and Pre-Cap Inspection
- Blank = None of the Above

Process Requirements:

- 0 = Standard DDC Processing, no Burn-In (See page xiii.)
- 1 = MIL-PRF-38534 Compliant
- 2 = B*
- 3 = MIL-PRF-38534 Compliant with PIND Testing
- 4 = MIL-PRF-38534 Compliant with Solder Dip
- 5 = MIL-PRF-38534 Compliant with PIND Testing and Solder Dip
- 6 = B* with PIND Testing
- 7 = B* with Solder Dip
- 8 = B* with PIND Testing and Solder Dip
- 9 = Standard DDC Processing with Solder Dip, no Burn-In (See page xiii.)

Temperature Grade/Data Requirements:

- 1 = -55°C to +125°C
- 2 = -40°C to +85°C
- 3 = 0°C to +70°C
- 4 = -55°C to +125°C with Variables Test Data
- 5 = -40°C to +85°C with Variables Test Data
- 8 = 0°C to +70°C with Variables Test Data

NOTE: Mating Transformer is BUS-25679
