NEC

SILICON POWER TRANSISTOR
2SC4342

NPN SILICON EPITAXIAL TRANSISTOR (DARLINGTON CONNECTION) FOR HIGH-SPEED SWITCHING

DESCRIPTION

The 2SC4342 is a high-speed Darlington power transistor.

This transistor is ideal for high-precision control such as PWM control for pulse motors or blushless of OA and FA equipment.

ORDERING INFORMATION

PART NUMBER	PACKAGE
2SC4342	TO-126 (MP-5)

FEATURES

- On-chip C-to-E reverse diode
- Fast switching speed

ABSOLUTE MAXIMUM RATINGS (T_A = 25°C)

Collector to Base Voltage	V_{CBO}	150	V
Collector to Emitter Voltage	V_{CEO}	100	V
Emitter to Base Voltage	V_{EBO}	8.0	V
Collector Current (DC)	$I_{C(DC)}$	±3.0	A
Collector Current (pulse)	$I_{C(pulse)}$ **Note**	±5.0	A
Base Current (DC)	$I_{B(DC)}$	0.3	A
Total Power Dissipation (T_A = 25°C)	P_{T1}	1.3	W
Total Power Dissipation (T_C = 25°C)	P_{T2}	12	W
Junction Temperature	T_j	150	°C
Storage Temperature	T_{stg}	–55 to +150	°C

Note PW ≤ 10 ms, Duty Cycle ≤ 50%

Document No. D14862EJ3V0DS00 (3rd edition)
Date Published July 2004 NS CP(K)
Printed in Japan

The mark ★ shows major revised points.

ELECTRICAL CHARACTERISTICS (T_A = 25°C)

CHARACTERISTICS	SYMBOL	TEST CONDITIONS	MIN.	TYP.	MAX.	UNIT
Collector Cut-off Current	I_{CBO}	V_{CB} = 100 V, I_E = 0 A			1.0	μA
Emitter Cut-off Current	I_{EBO}	V_{EB} = 5.0 V, I_C = 0 A			5.0	mA
DC Current Gain **Note**	h_{FE1}	V_{CE} = 2.0 V, I_C = 1.5 A	2000		20000	
	h_{FE2}	V_{CE} = 2.0 V, I_C = 3.0 A	1000			
Collector Saturation Voltage **Note**	$V_{CE(sat)}$	I_C = 1.5 A, I_B = 1.5 mA			1.5	V
Base Saturation Voltage **Note**	$V_{BE(sat)}$	I_C = 1.5 A, I_B = 1.5 mA			2.0	V
Turn-on Time	t_{on}	I_C = 1.5 A, R_L = 33 Ω		0.3		μs
Storage Time	t_{stg}	I_{B1} = $-I_{B2}$ = 3.0 mA, V_{CC} ≒ 50 V		1.5		μs
Fall Time	t_f	Refer fo the switching time (t_{on}, t_{stg}, t_f) test circuit		0.4		μs

Note Pulsed test PW ≤ 350 μs, Duty Cycle ≤ 2%

★ h_{FE} CLASSIFICATION

Marking	M	L	K
h_{FE1}	2000 to 5000	4000 to 10000	8000 to 20000

- **The information in this document is current as of July, 2004. The information is subject to change without notice. For actual design-in, refer to the latest publications of NEC Electronics data sheets or data books, etc., for the most up-to-date specifications of NEC Electronics products. Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.**
- No part of this document may be copied or reproduced in any form or by any means without the prior written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from the use of NEC Electronics products listed in this document or any other liability arising from the use of such products. No license, express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative purposes in semiconductor product operation and application examples. The incorporation of these circuits, software and information in the design of a customer's equipment shall be done under the full responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality, reliability and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. To minimize risks of damage to property or injury (including death) to persons arising from defects in NEC Electronics products, customers must incorporate sufficient safety measures in their design, such as redundancy, fire-containment and anti-failure features.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".

  The "Specific" quality grade applies only to NEC Electronics products developed based on a customer-designated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.

  "Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.

  "Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).

  "Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.

(Note)

(1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.

(2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).
