70 W, 4.4 - 5.9 GHz, 50 V, RF Power GaN HEMT

## Description

Wolfspeed's CGHV59070 is an internally matched gallium nitride (GaN) high electron mobility transistor (HEMT). The CGHV59070, operating from a 50 volt rail, offers a general purpose, broadband solution to a variety of RF and microwave applications. The good efficiency, high gain and wide bandwidth capabilities make the CGHV59070 ideal for linear applications such as wireless infrastructure and for compressed amplifier circuits. The transistor is available in a flange and pill package.
