- custom aspheric lensed TO-18
- transistor base is bonded
- usable throughout visible and near infrared spectrum
- RoHS compliant

description

The CLR130-CLR132 series are NPN silicon photodarlington mounted in TO-18 packages. Photodarlington allow high sensitivity at low irradiance levels. A custom double convex glass-to-metal sealed aspheric lens provides a narrow acceptance angle for excellent on-axis coupling. These devices are mechanically and spectrally matched to the CLE130-CLE133 series IREDs. For additional information, call Clairex.
