1. Application

This Specification is applicable to 14.4cm (5.7 inch) Blanview TFT-LCD monitor for non-military use.

◎ ORTUS TECHNOLOGY makes no warranty or assume no liability that use of this Product and/or any information
  including drawings in this Specification by Purchaser is not infringing any patent or other intellectual
  property rights owned by third parties, and ORTUS TECHNOLOGY shall not grant to Purchaser any right to use
  any patent or other intellectual property rights owned by third parties. Since this Specification contains
  ORTUS TECHNOLOGY's confidential information and copy right, Purchaser shall use them with high degree of
  care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of
  ORTUS TECHNOLOGY'S confidential information and copy right.

◎ If Purchaser intends to use this Products for an application which requires higher level of reliability
  and/or safety in functionality and/or accuracy such as transport equipment
  (aircraft, train, automobile, etcr.), disaster-prevention/security equipment or various safety
  equipment, Purchaser shall consult ORTUS TECHNOLOGY on such use in advance.

◎ This Product shall not be used for application which requires extremely higher level of
  reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines,
  control equipment for nuclear facilities or life-support medical equipment.

◎ It must be noted as an mechaniacl design manner, especial attention in housing design to prevent
  arcuation/flexureor caused by stress to the LCD module shall be considered.

◎ ORTUS TECHNOLOGY assumes no liability for any damage resulting from misuse, abuse, and/or
  miss-operation of the Product deviating from the operating conditions and precautions
  described in the Specification.

◎ ORTUS TECHNOLOGY is not responsible for any nonconformities and defects
  that are not specified in this specifications.

◎ If any issue arises as to information provided in this Specification or any other information,
   ORTUS TECHNOLOGY and Purchaser shall discuss them in good faith and seek solution.

◎ ORTUS TECHNOLOGY assumes no liability for defects such as electrostatic discharge failure occurred
  during peeling off the protective film or Purchaser's assembly process.

◎ This Product is compatible for RoHS directive.

2. Outline Specifications

2.1 Features of the Product

- 5.7 inch diagonal display, 1,920 [H] x 480 [V] dots.
- 6-bit 262,144 color display capability.
- Built in Timing generator (TG).
- Long life & High bright white LED back-light.
- Blanview TFT-LCD, improved outdoor readability.

<Features of Blanview>
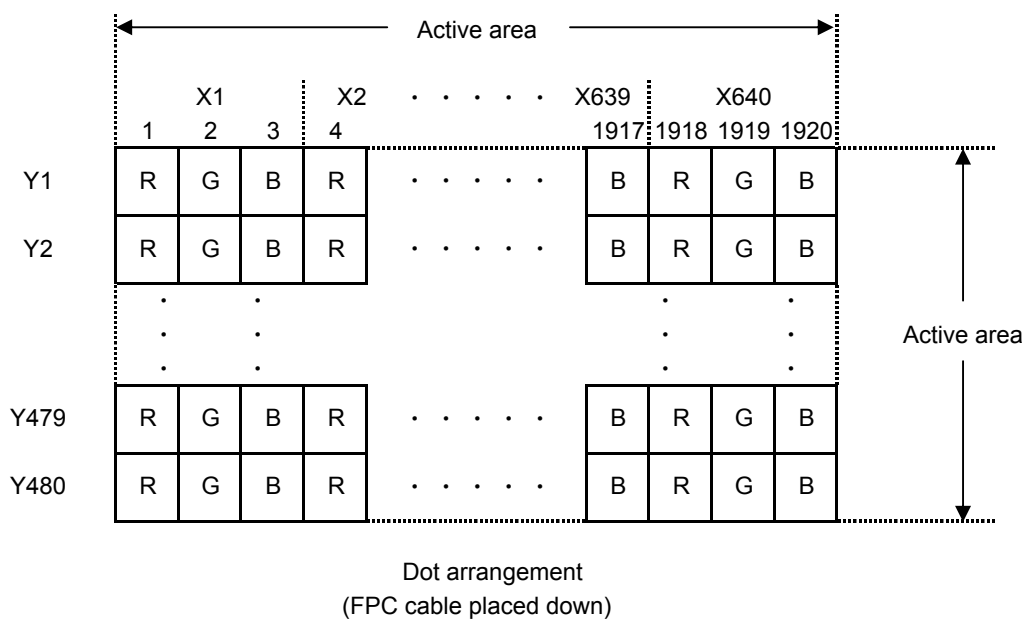

- Backlight power consumption required to assure visibility. (equivalent to 3.5"QVGA)

*Comparison with our conventional products

Transmissive

Transmissivity is low, requiring a power-hungry backlight

Power-hungry backlight that competes effectively with outdoor light is required.

Transflective

Improved contrast, whiteness and outdoor visibility.

- Contrast characteristics under 100,000lx.（same condition as direct sunlight.）

    With better contrast (higher contrast ratio), Blanview TFT-LCD has the best outdoor readability
    in three different types of TFT-LCD.
    Below chart shows contrast value against panel surface brightness. (Horizontal: Panel surface brightness/
    Vertical: Contrast value) LCD panel has enough outdoor readability above our Standard line.

3.3 SERIAL LABEL (S-LABEL)

1) Display Items

    A section : Bar code

    B section : Combination of a character

Details of B section

    Upper culumn: It indicates The least significant digit of manufacture year (1 digit),

                    manufacture month with below alphabet (1letter), model code (5characters),

                     serial number (6digits).

                     *   *   ***** ******

                     a   b   c   d

    Lower culumn: Model (13characters)

	Contents of display						
a	The least significant digit of manufacture year						
b	Manufacture month	Jan-A	Mar-C	May-E	Jul-G	Sep-I	Nov-K
		Feb-B	Apr-D	Jun-F	Aug-H	Oct-J	Dec-L
c	Model code	57EYC (Made in Japan)					
		57EZC (Made in Malaysia)					
d	Serial number						

  * Example of indication of Serial label (S-label)

        ・Made in Japan

        | 6C57EYC000125 |

        means "manufactured in March 2016, 5.7" EY type,

        C specifications, serial number 000125"

        ・Made in Malaysia

        | 6C57EZC000125 |

        means "manufactured in March 2016, 5.7" EZ type,

        C specifications, serial number 000125"

2) Location of Serial Label (S-label)

    Refer to 3.2 "Outward Form".

3) Others

    Bar code readablity is excluded from quality assurance coverage.

- Recommended connector: Kyocera connector products, 6240 series [04 6240 045 023 846+]
- Please make sure to check a consistency between pin assignment in "3.2 Outward Form" and
  your connector pin assignment when designing your circuit.
  Inconsistency in input signal assignment may cause a malfunction.
- Since FPC cable has gold plated terminals, gilt finish contact shoe connector is recommended.

Note: - The lifetime of the LED is defined as a period till the brightness of the LED
decreases to the half of its initial value.
- This figure is given as a reference purpose only, and not as a guarantee.
- This figure is estimated for an LED operating alone.
As the performance of an LED may differ when assembled as a monitor
together with a TFT panel due to different environmental temperature.
- Estimated lifetime could vary on a different temperature and usually
higher temperature could reduce the life significantly.

8. Description of Operation

8.1 Power On/Off Sequence

The sequence of the Power On/Off and the signal input must defend the following conditions.

- Please input the logic signal after turning on VDD.
- Please input AVDD after turning on VDD or at the same time.
- Please input V1, V5, V6, V10 and VCOM voltage after turning on AVDD.
- Please input VGL after turning on VDD.
- Please input VGH after turning on VGL.

Power Off sequence is assumed to be opposite of the above mentioned sequence.

Please refer Power On/Off recommended sequence is shown in the figure below.
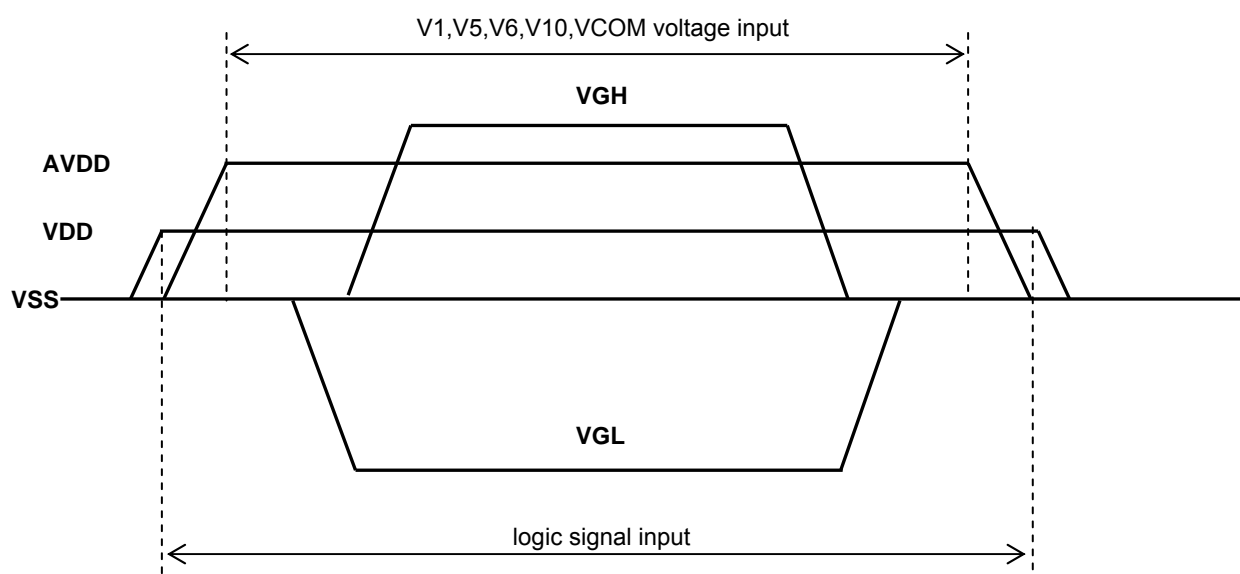

8.2 Power On Clear

There is a limitation between Power On and POCB (power on clear) .
Please defend the following conditions.

11. Criteria of Judgment

11.1 Defective Display and Screen Quality

Test Condition:	Observed TFT-LCD monitor from front during operation with the following conditions
Driving Signal	Raster Patter (RGB, white, black)
Signal condition	[Data]:3Fh,18h,00h (3steps)
Observation distance	30 cm
Illuminance	200 to 350 lx
Backlight	IL=10.2mA

Defect item		Defect content			Criteria
Display Quality	Line defect	Black, white or color line, 3 or more neighboring defective dots			Not exists
	Dot defect	Uneven brightness on dot-by-dot base due to defective TFT or CF, or dust is counted as dot defect (brighter dot, darker dot) High bright dot: Visible through 2% ND filter at [Data]=00h Low bright dot: Visible through 5% ND filter at [Data]=00h Dark dot: Appear dark through white display at [Data]=18h			Refer to table 1
		Invisible through 5% ND filter at [Data]=00h			ignored
Screen Quality	Dirt	Uneven brightness (white stain, black stain etc)			Invisible through 1% ND filter
	Foreign particle	Point-like	0.25mm< φ		N=0
			0.20mm< φ ≦0.25mm		N≦2
			φ ≦0.20mm		Ignored
		Liner	3.0mm<length and 0.08mm<width		N=0
			length≦3.0mm or width≦0.08mm		Ignored
	Others				Use boundary sample for judgment when necessary

φ(mm): Average diameter = (major axis + minor axis)/2

Permissible number: N

13. Packing Specifications

Packing specification
（S=FREE）
Step 1. Each product is to be placed in one of the cut-outs of the tray with the display surface facing upward.
(4 products per tray)

Step 2. Each tray is to be piled up in same orientation and the trays be in a stack of 7.
One empty tray is to be put on the top of stack of 7 trays.

Step 3. 2 packs of moisture absobers are to be placed on the top tray as shown in the drawing.
Put piled trays into a sealing bag.
Vacuum and seal the sealing bag with the vacuum sealing machine.

Step 4. The stack of trays in the plastic back is to be inserted into a inner carton.

Step 5. A corrugated board is to be placed on the top and on the bottom of the inner carton.
The two corrugated boards and the inner carton is to be inserted into an outer carton.

Step 6. The outer carton needs to sealed with packing tape as shown in the drawing.
The model number, quantity of products, and shipping date are to be printed on the outer carton.
If necessary, shipping labels or impression markings are to be put on the outer carton.

Step 7. The outer carton is to be inserted into a extra outer carton with same direction.
The extra outer carton needs to sealed with packing tape as shown in the drawing.

Step 8. The model number, quantity of products, and shipping date are to be printed on the extra outer carton.
If necessary, shipping labels or impression markings are to be put on the extra outer carton.
Remark: The return of packing materials is not required.

14. Handling Instruction
   14.1 Cautions for Handling LCD panels

⚠ **Caution**

(1)   Do not make an impact on the LCD panel glass because it may break and you may get injured from it.

(2)   If the glass breaks, do not touch it with bare hands.
      （Fragment of broken glass may stick you or you cut yourself on it.

(3)   If you get injured, receive adequate first aid and consult a medial doctor.

(4)   Do not let liquid crystal get into your mouth.
      （If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property
      of liquid crystal has not been confirmed.

(5)   If liquid crystal adheres, rinse it out thoroughly.
      （If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash
      it thoroughly with soap. If liquid crystal gets into eyes, rinse it with clean water
      for at least 15 minutes and consult an eye doctor.

(6)   If you scrap this products, follow a disposal standard of industrial waste
      that is legally valid in the community, country or territory where you reside.

(7)   Do not connect or disconnect this product while its application products is powered on.

(8)   Do not attempt to disassemble or modify this product as it is precision component.

(9)   If a part of soldering part has been exposed, and avoid contact (short-circuit)
      with a metallic part of the case etc. about FPC of this model, please.
      Please insulate it with the insulating tape etc. if necessary.
      The defective operation is caused, and there is a possibility to generation
      of heat and the ignition.

(10) Since excess current protection circuit is not built in this TFT module, there is the possibility that
      LCD module or peripheral circuit become feverish and burned in case abnoramal operation is generated.
      We recommend you to add excess current protection circuit to power supply.

⚠ **Caution**   **This mark is used to indicate a precaution or an
instruction which, if not correctly observed, may
result in bodily injury, or material damages alone.**

ORTUS TECHNOLOGY CO.,LTD.

14.2 Precautions for Handling

1) Wear finger tips at incoming inspection and for handling the TFT monitors to keep
display quality and keep the working area clean.
Do not touch the surface of the monitor as it is easily scratched.

2) Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static
charge and discharge when handling the TFT monitors as the LED in this TFT monitors
is damageable to electrostatic discharge.
Designate an appropriate operating area, and set equipment, tools, and machines properly
when handling this product.

3) Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors
for protecting their glass parts. Do not use the TFT monitors that have been experienced
dropping or strong mechanical shock.

4) Do not use or storage the TFT monitors at high temperature and high humidity environment.
Particularly, never use or storage the TFT monitors at a location where condensation builds up.

5) Avoid using and storing TFT monitors at a location where they are exposed to direct
sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.

6) Do not stain or damage the contacts of the FPC cable .
FPC cable needs to be inserted until it can reach to the end of connector slot.
During insertion, make sure to keep the cable in a horizontal position to avoid an oblique insertion.
Otherwise, it may cause poor contact or deteriorate reliability of the FPC cable.

7) Do not bend or pull the FPC cable or carry the TFT monitor by holding the FPC cable.

8) Peel off the protective film on the TFT monitors during mounting process.
Refer to the section 14.5 on how to peel off the protective film.
We are not responsible for electrostatic discharge failures or other defects
occur when peeling off the protective film.

14.3 Precautions for Operation

1) Since this TFT monitors are not equipped with light shielding for the driver IC,
do not expose the driver IC to strong lights during operation as it may cause functional failures.

2) In case of powering up or powering off this LCD module,
be sure to comply the sequence as instructed in this specification.

3) Optimize VCOMDC within recommended operating conditions.
* When VCOMDC is not an optimal value, flicker and image sticking will be occuerd.

4) Do not plug in or out the FPC cable while power supply is switch on.
Plug the FPC cable in and out while power supply is switched off.

5) Do not operate the TFT monitors in the strong magnetic field. It may break the TFT monitors.

6) Do not display a fixed image on the screen for a long time.
Use a screen-saver or other measures to avoid a fixed image displayed
on the screen for a long time. Otherwise, it may cause burn-in image
on the screen due the characteristics of liquid crystal.

SPECIFICATIONS № 14TLM145	Issue: Jul.3, 2015

14.4 Storage Condition for Shipping Cartons

Storage environment
- Temperature   0 to 40°C
- Humidity   60%RH or less
                     No-condensing occurs under low temperature with high humidity condition.
- Atmosphere   No poisonous gas that can erode electronic components and/or wiring
                     materials should be detected.
- Time period   3 months
- Unpacking   To prevent damages caused by static electricity, anti-static precautionary measures
                     (e.g. earthing, anti-static mat) should be implemented.

- Maximum piling up   7 cartons

14.5 Precautions for Peeling off the Protective film

The followings work environment and work method are recommended to prevent the TFT monitors from static damage or adhesion of dust when peeling off the protective films.

A) Work Environment
   a) Humidity: 50 to 70 %RH, Temperature15 to 27°C
   b) Operators should wear conductive shoes, conductive clothes, conductive finger tips
      and grounded wrist-straps. Anti-static treatment should be implemented to work area's floor.
   c) Use a room shielded against outside dust with sticky floor mat laid
      at the entrance to eliminate dirt.

B) Work Method
   The following procedures should taken to prevent the driver ICs from charging and discharging.
   a) Use an electrostatic neutralization blower to blow air on the TFT monitors to
      its lower left when "S LABEL" on the front case is placed at the bottom.
      Optimize direction of the blowing air and the distance between the TFT monitors
      and the electrostatic neutralization blower.
   b) Put an adhesive tape (Scotch tape, etc) at the lower left corner area
      of the protective film to prevent scratch on surface of TFT monitors.
   c) Peel off the adhesive tape slowly (spending more than 2 secs to complete)
      by pulling it to opposite direction.
Direction of blowing air
（Optimize air direction and the distance)
