

CW3002D

USB Charging Controller

Q176490316 136 7023 2221

Features

- D+/D- DCP Mode per USB Battery Charging Specification 1.2
- D+/D- Short Mode per Telecommunication Industry Standard YD/T1591-2009 (Chinese)
- Supports non-BC1.2 Charging Modes by Automatic Selection
 - D+/D- Option for Apple Device
 - D+/D- Option for Samsung Device
- Operating Voltage Range: 4.5V to 5.5V
- Power Consumption
 - 5uA When VDD < POR threshold
 - 180uA When VDD > POR threshold
- Lead(Pb)-Free, Halogen-Free, SOT23-5 Package
- 8kV HBM ESD Rating on D+/D- Pins

Applications

- Power bank
- USB Ports (Hosts and Hubs)
- MID OTG Port
- Wall Charging Adapters

General Description

The CW3002 is the USB dedicated charging controller IC, which is fully compatible with BC1.2 and other non-BC1.2 standards like YT/D1591-2009, Apple charging specification (for i-Pad & i-Phones) and specs from Samsung Galaxy family.

The IC is used to facilitate charging procedure when most of the mainstream handheld devices are detected.

The CW3002 is suitable for all the charger products using USB interface like power bank, wall adapter and even MID device with OTG function. The IC is provided with enhanced ESD protection up to +/-8kV with application on D+/D- Pins.

CW3002 is available in tiny SOT23-5 package.

Absolute Maximum Ratings

Voltage on VCC Pin Relative to GND	GND-0.3 to GND+6V
Voltage on SEL Pin Relative to GND	GND-0.3 to VCC+0.3V
Voltage on DP DM Relative to GND	GND-0.3 to VCC+0.3V
Operating Temperature Range	-30°C to 80°C
Junction Temperature	150°C
Store Temperature Range	-55°C to 125°C

Caution:

Stresses beyond "Absolute Maximum Ratings" condition may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Pin Arrangement and Description

Function

CW3002 is a specified USB charger controller IC for external device charging. CW3002, integrated with intelligent USB detection circuits, can identify most of the handheld equipment in market, such as Apple, Samsung, HTC mobile phones and other USB supplied devices.

CW3002 monitors the D+/D- voltage all the time, and automatically emulates the corresponding USB type for the attached device. Then, the attached device can employ a big current as MAX as 2.4A to charge itself.

CW3002 only changes the D+/D- voltage to suitable value for different devices; it does not control the charging current loop. The actual charge current is

determined by the power supply and the charge management IC in attached device.

SEL Pin

CW3002 uses a SEL pin to choose the different Apple charge current.

Pull low through a resistor less than (or equal to) 1kΩ is for 1A option; Pull high or pull low through a resistor between 1MΩ and 2MΩ are all for 2.4A option.

SEL potential	Option
1	2.4A
0 (R < 1kΩ)	1A
H (1MΩ < R < 2MΩ)	2.4A
