

DCT-250
 DBX-275
 DCT-350
 DCX-350

STANDARD DBX SERIES
24/28 VDC INPUT – MULTIPLE OUTPUT

MODEL	PWR	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
DBX-273-0512	275	+5V @ 50A	+12V @ 8/12A pk	-12V @ 4A	
DBX-274-1205	275	+5V @ 50A	+12V @ 8/12A pk	-12V @ 4A	5.2V @ 2 A
DBX-274-1224	275	+5V @ 50A	+12V @ 8/12A pk	-12V @ 4A	24V @ 1.5A

STANDARD DCT, DCX SERIES
48 VDC INPUT – MULTIPLE OUTPUT

MODEL	PWR	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
DCT-253-0512	250	+5V @ 30A	+12V @ 5A	-12V @ 5A	
DCT-353-0512	350	+5V @ 45A	+12V @ 6A	-12V @ 6A	
DCX-353-0512	350	+5V @ 50A	+12V @ 8/12A pk	-12V @ 4A	
DCX-354-1205	350	+5V @ 50A	+12V @ 8/12A pk	-12V @ 4A	5.2V @ 2A

Featuring:

- Over 3 watts/in³ power density
- Meets international safety requirements
- All outputs regulated $\pm 1\%$
- High peak currents for motor starting
- System air and self-cooling options
- Available in dual AC input range

These series are particularly suitable for critical, "can't fail"; mobile; or transportable systems. All models share the same footprint and can include current sharing for redundancy (consult factory for details).

Optional DC power fail, covers, and fan/cover assemblies are available. These series are form-fit compatible with the 9" SC, MAX, MTC, and MPS Series

250, 275, 350 WATTS
9" x 5" x 2.5"

DBX, DCT, DCX with Option F
3.8 lbs - 1.7 kgs

SPECIFICATIONS: ALL MODELS

INPUT

DC Input: DB, DBT, and DBX models 20-32 Vdc range, internally fused for 20 A. DC, DCT, DCX, and DPS models 40.8-60 Vdc range, internally fused for 15 A.
Efficiency: 70 to 75% typical.

OUTPUT

Adjustability: All outputs user adjustable $\pm 5\%$ minimum.
Line & Load Reg: $\pm 1\%$ over DC input range and 0 to 100% load change, except DPS models hold $\pm 3\%$ on +5 V output (preprogrammed slope). Multiple output units require a minimum load of 10% on the +5 V output when drawing full load on the auxiliary outputs.
Ripple & Noise: Less than 1% p-p or 100 mV, whichever is greater.

Remote Sense (Output #1): Compensates for 250 mV total line drop. Open sense lead protection. (See Redundancy, below.)

Temperature Coefficient: 0.02% per degree C.

Stability: 0.1% over 8 hours after 30 minutes warm-up.

Transient Response: Output voltage returns to within 1% in less than 500 μ s for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection (Output #1): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Remote Inhibit: Contact closure to the negative sense line drops output power to nominal zero.

Redundancy (DPS only): External OR-ing diodes and slope program current sharing on output #1 provide "N+1" capability. Remote sense (+S) compensates for additional 0.6 V diode voltage drop. Current sharing remains within 10% of the unit's full output current rating.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

ENVIRONMENTAL

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Temperature Range: 0° to 50°C at full ratings.

Safety Agencies: Most models are approved to UL1950; CSA 22.2 #234; IEC 950 and TÜV EN60950, Class 1 SELV, CE 72/23/EEC/93/68EEC (low voltage directive).

Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN55022 Class B; CISPR 22 Class B.

Cooling: 30 CFM required to achieve full ratings.

Output Isolation: Isolated from ground 50 Vdc, except 100 Vdc for models rated 48 Vdc output.

OPTIONS:

Option "C", Cover: Limits contact with power supply interior.

Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings at 50°C ambient temperature.

Option "G", DC Power Good: Provides a TTL "1" open collector when output #1 is above 4.6 V nominal.

Option "V", Fan/Cover Assembly: Low profile, end venting cover with integral ball-bearing fan.

Consult factory for other available options.

DC INPUT

FUNCTION	-48 Vdc	+24 Vdc	CONNECTOR
