# Multifunction 12 Digits Watch CMOS

The BS6294 is a CMOS digital 6-function watch integrated circuit with alarm and chronograph function. It's designed for a 12-digit liquid crystal display. The BS6294 generates alarm, chime and touch-tone signals on the BD, BDN outputs to drive a buzzer and provides special signal on the ALB output to initiate a melody chip (same as BS8081, BS8018)

The BS6294 activates animation picture ("Garland") on the LCD. The BS6294 generates special signal to drive EL-backlight panel by external transistors.
