Synchronous Presetable Binary Counter

These devices are high-speed synchronous modulo-16 binary counters. They are synchronously presetable for application in programmable dividers and have two types of Count Enable inputs plus a Terminal Count output for versatility in forming synchronous multistage counters. The DV74AC161 and the DV74ACT161 have an asynchronous Master Reset input that overrides all other inputs and forces the outputs LOW. The DV74AC163 and the DV74ACT163 have a Synchronous Reset input that overrides counting and parallel loading and allows the outputs to be simultaneously reset on the rising edge of the clock.

- Advanced very high speed CMOS
- Outputs source/sink 24 mA
- Transmission line driving 50 ohms
- ACT has TTL compatible inputs

- Operation from 2 to 6 volts guaranteed
- DC & AC Parameters guaranteed over -40 to +85°C
