Life expectancy: 10 000 hours under the following life-test conditions: ←

Durée prévue : 10 000 heures sous les conditions d'essai de durée suivantes:

Erwartete Lebensdauer: 10 000 Stunden unter folgenden Bedingungen einer Lebensdauerprobe

$V_f = 6,3 \text{ V}$	$V_{g2} = 200 \text{ V}$
$V_a = 200 \text{ V}$	$R_k = 130 \text{ } \Omega$
$V_{g3} = 0 \text{ V}$	$V_{kf} \text{ (k pos.)} = 120 \text{ V}$

The data indicating the endpoint of life are given in column III under the heading Characteristics

Les valeurs déterminant la fin de la durée sont données dans la colonne III des Caractéristiques

Die Werte die das Ende der Lebensdauer bestimmen sind angegeben worden in Spalte III der Kenndaten

Shock resistance: about 500 g¹⁾

Forces as applied by the NRL impact machine for electronic devices caused by 5 blows of the hammer, lifted over an angle of 30° in each of four different positions of the tube

Vibration resistance: 2.5 g¹⁾

Vibrational forces for a period of 32 hours at a frequency of 50 c/s in each of 3 positions of the tube

Résistance aux chocs: environ 500 g¹⁾

Des forces telles que celles appliquées par la machine à chocs NRL pour dispositifs électroniques, produites par 5 coups du marteau, soulevé d'un angle de 30° dans chacune de quatre positions différentes du tube

Résistance aux vibrations: 2,5 g¹⁾

Des forces de vibration pendant une période de 32 heures à une fréquence de 50 Hz dans chacune de trois positions du tube

Stossfestigkeit: etwa 500 g¹⁾

Stossbeschleunigungen gemäss NRL-Stossmaschine für elektronische Geräte, verursacht durch 5 Schläge des Hammers, der in jeder von vier verschiedenen Stellungen der Röhre über einen Winkel von 30° gehoben wird

Vibrationsfestigkeit: 2,5 g¹⁾

Vibrationskräfte während einer Periode von 32 Stunden bei einer Frequenz von 50 Hz in jeder von 3 Stellungen der Röhre

¹⁾ These test conditions are only given for evaluation of the ruggedness of the tube. They are by no means to be interpreted as suitable operating conditions.

Ces conditions d'essai sont données seulement pour l'évaluation de la robustesse du tube. En aucune manière elles ne doivent être interprétées comme des conditions de fonctionnement normales

Diese Prüfbedingungen dienen lediglich zur Beurteilung der Robustheit der Röhre und sind keinesfalls als geeignete Betriebsbedingungen aufzufassen
