

General Description

The EC48117 is a series of low dropout three-terminal regulators with a dropout of 1.15V at 1A output current.

The EC48117 series provides current limiting and thermal shutdown. Its circuit includes a trimmed bandgap reference to assure output voltage accuracy to be within 1%. Current limit is trimmed to ensure specified output current and controlled short-circuit current. On-chip thermal shutdown provides protection against any combination of overload and ambient temperature that would create excessive junction temperature.

The EC48117 has an adjustable version that can provide the output voltage from 1.25V to 12V with only 2 external resistors.

The EC48117 series is available in the industry standard SOT-223, SOT-89, TO-220, TO-252, TO-263 power packages.

Features

Low Dropout Voltage: 1.15V at 1A Output Current

Trimmed Current Limit

On-Chip Thermal Shutdown

Three-Terminal Adjustable or Fixed 1.5V, 1.8V, 2.5V, 3.3V, 5V

Operation Junction Temperature: 0°C to 125°C

Applications

PC Motherboard

LCD Monitor

Graphic Card

DVD-Video Player

NIC/Switch

Telecom Equipment

ADSL Modem

Printer and other Peripheral Equipment

Absolute Maximum Ratings (Note 1)

Parameter	Value	Unit
V_{IN}	20	V
Maximum Junction Temperature	150	°C
Storage Temperature Range	-65 to 150	°C
Lead Temperature (Soldering, 10 sec.)	300	°C
ESD (Machine Model)	600	V

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

Recommended Operating Conditions
