

EN2997Y(E) Qualified Product

Product Description

Sealtron is a manufacturer of EN2997 Y and YE hermetic connectors and is qualified to the ASD (formerly known as Association Europeene des Constructeurs de Materiel Aerospatial or AECMA) specification. We offer a full range of receptacles: EN2997-005 Class Y and YE, EN2997-006 Class Y & YE and EN2997-007 Class Y & YE in shell sizes 8 thru 28.

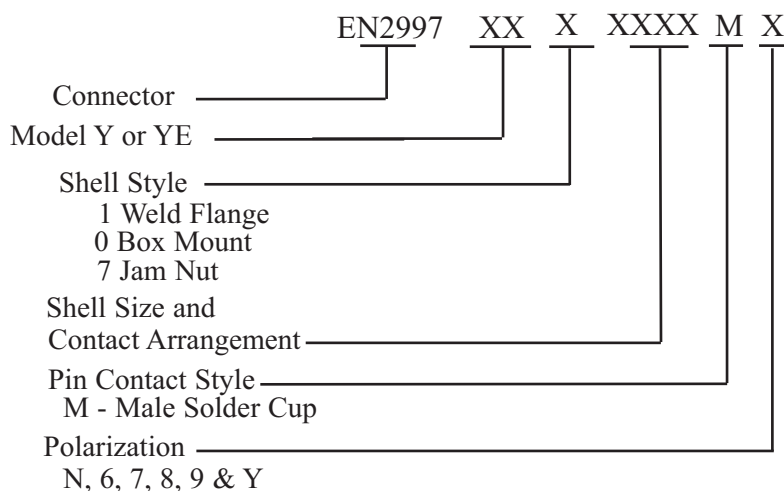

Principle design features include: metal-to-metal grounding between receptacles and mating plugs, passivated stainless steel shell material and Gold plated electrical contacts with solder cup terminations. The product is qualified to operate up to 260° Celsius (cyclical) and will withstand an extended range of fluids in an aerospace environment.

For customers who prefer solder eyelet style terminations on their electrical contacts or thermocouple (Type K) pins, these are available as commercial equivalents that “meet the design requirements” of EN2997, but cannot be marked with the EN part number nor certified to the specification.

Sealtron’s quality system is registered to AS9100 and ISO 9001:2000. The company is also a manufacturer of U. S. Military qualified product to MIL-DTL-26482 Series I & II, MIL-DTL-38999 Series I, II, & III and MIL-DTL-83723 and of ESC 10 connectors to the SBAC specification.

EN Part Numbering Systems

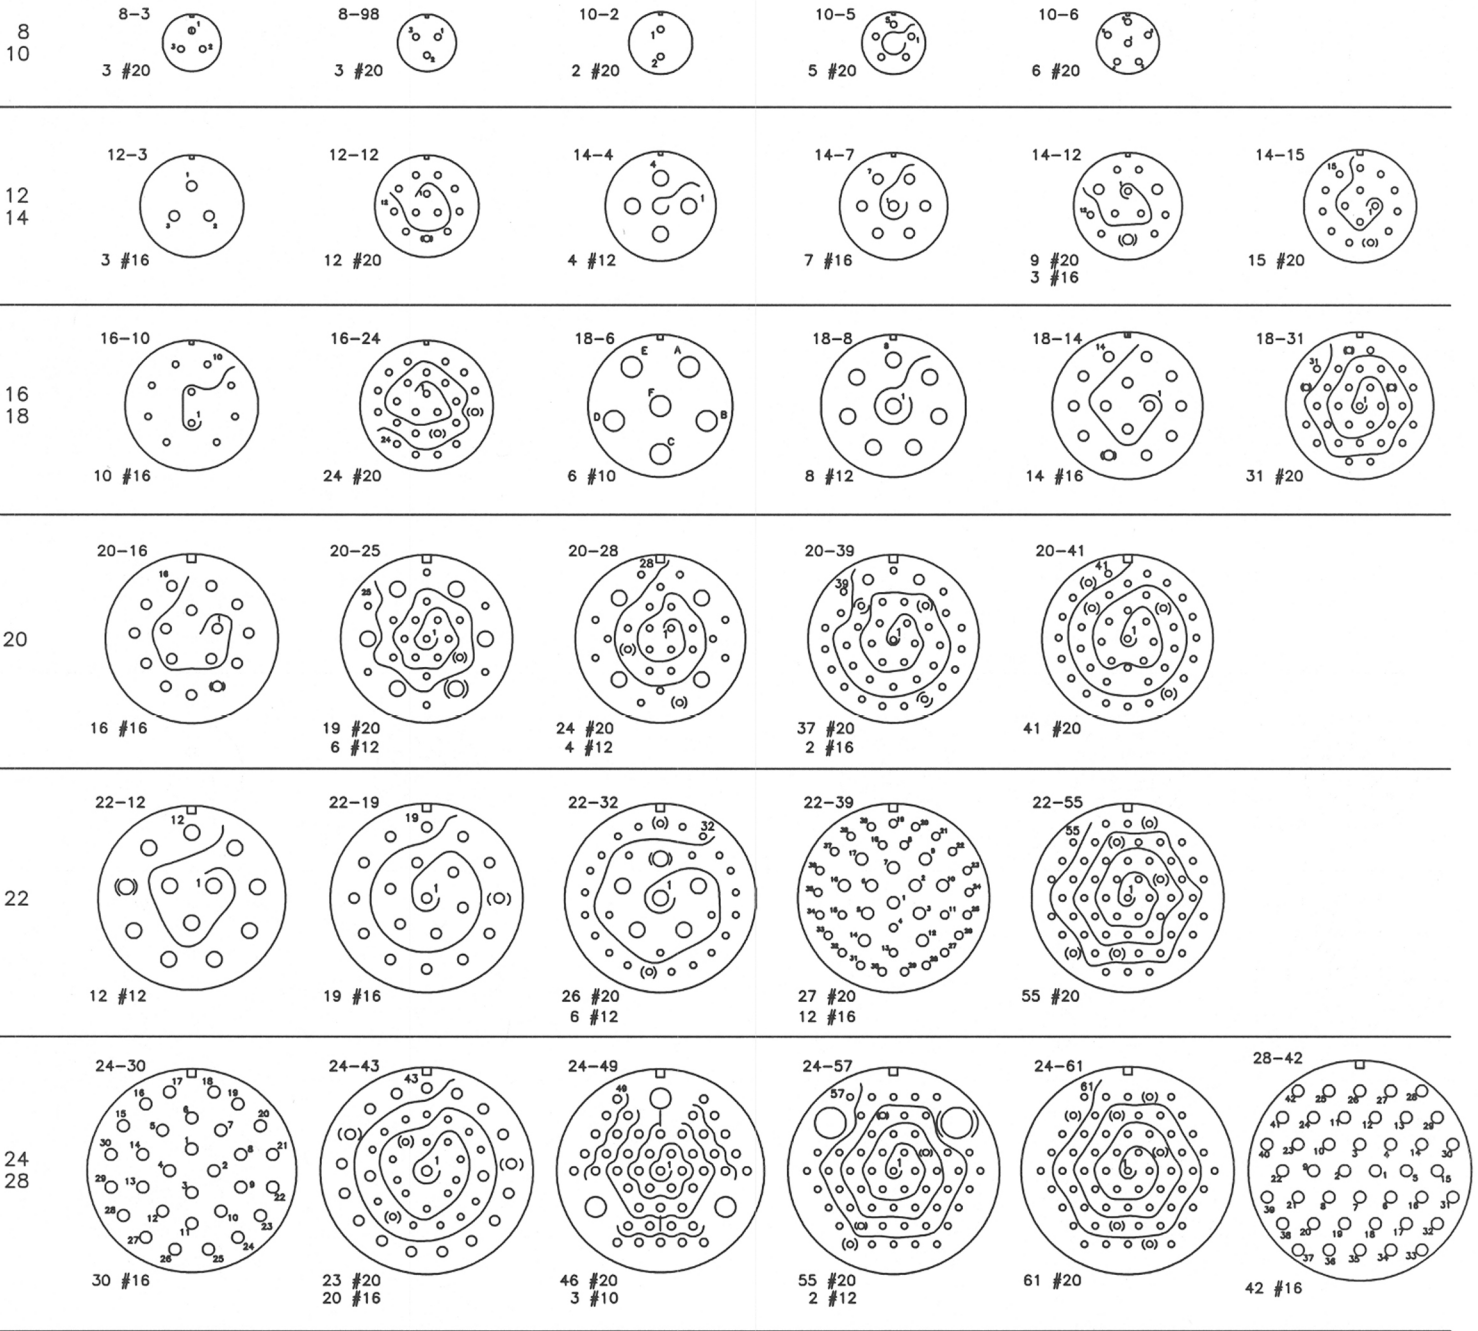

Connector types will be identified in the following manner:

Insert Arrangements

Engaging face of pin insert shown

Other arrangements as shown in MIL-Std-1554 available by special order.

General Specifications

Temperature:

Class Y - 65° C to + 200° C

Class YE - 65° C to + 260° C cyclical

Amperage:

#20 Contact - 5.5 A

#16 Contact - 11 A

#12 Contact - 20 A

Fluid Immersion:

Synthetic Lube Oil

Per MIL-L-23699

Hydraulic Fluid

Per MIL-H-5606

Ethylene Glycol

Per MIL-A-8243

1,1,1, Trichloroethane

Kerosene MIL-T-5624

Skydrol LD4

Freon TF

Per MIL-C-81302

Bromochloromethane

Per MIL-B-4394

White Spirit BS 245

(Stoddard Solvent)

Genklene BS 4487

Air Leakage (Hermeticity):

Leakage rate less than .01 microns per cubic foot per hour(1x 10⁻⁷ cc/sec) of Helium at 15 psi.

Insert Retention:

Shell Size	Test Pressure kPa	Test Pressure lbf/in ²
8 to 12	1035	150
14 to 18	690	100
20 to 22	517	75
24 to 28	414	60

Dielectric Withstanding Voltage:

Altitude	Test Voltage	Duration
Sea Level	1500v rms 45-65 HZ	60 secs
70,000 ft.	1375v rms 45-65 HZ	60 secs

Thermal Shock:

No evidence of damage detrimental to the operation of the connector after testing at less than 4°C (39°F) to greater than 90°C(204°F)
