FDMA8051L

Single N-Channel PowerTrench[®] MOSFET

40 V, 10 A, 14 mΩ

Features

- Max $r_{DS(on)}$ = 14 m Ω at V_{GS} = 10 V, I_D = 10 A
- Max r_{DS(on)} = 18 mΩ at V_{GS} = 4.5 V, I_D = 8.5 A
- Low Profile 0.8 mm maximum in the new package MicroFET 2x2 mm
- Free from halogenated compounds and antimony oxides
- RoHS Compliant

General Description

This device has been designed to provide maximum efficiency and thermal performance for synchronous buck converters. The low rDS(on) and gate charge provide excellent switching performance.

Application

■ DC – DC Buck Converters

MOSFET Maximum Ratings T_A = 25 °C unless otherwise noted

Symbol	Param	Ratings	Units			
V _{DS}	Drain to Source Voltage			40	V	
V _{GS}	Gate to Source Voltage		±20	V		
1	Drain Current -Continuous	T _A = 25 °C	(Note 1a)	10	^	
D	-Pulsed		(Note 3)	80	— A	
р	Power Dissipation	T _A = 25 °C	(Note 1a)	2.4	w	
P _D	Power Dissipation	T _A = 25 °C	(Note 1b)	0.9		
T _J , T _{STG}	Operating and Storage Junction Temperature Range			-55 to +150	°C	

Thermal Characteristics

R_{\thetaJA}	Thermal Resistance, Junction to Ambient	(Note 1a)	52	°C/W
R_{\thetaJA}	Thermal Resistance, Junction to Ambient	(Note 1b)	145	C/VV

NOTES:

1. R_{θJA} is determined with the device mounted on a 1 in² pad 2 oz copper pad on a 1.5 x 1.5 in. board of FR-4 material. R_{θJC} is guaranteed by design while R_{θJA} is determined by the user's board design.

a. 52 °C/W when mounted on a 1 in² pad of 2 oz copper.

b. 145 °C/W when mounted on a minimum pad of 2 oz copper.

2. Pulse Test: Pulse Width < 300 $\mu s,$ Duty cycle < 2.0%.

3. Pulsed Id limited by junction temperature, td<=100 μ S, please refer to SOA curve for more details.

LIFE SUPPORT POLICY FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

2

As used here in:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user
- A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness

ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.Fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufactures of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed application, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handing and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address and warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

PRODUCT STATUS DEFINITIONS Definition of Terms

Datasheet Identification	Product Status	Definition		
Advance Information	Formative / In Design	Datasheet contains the design specifications for product development. Specifications may change in any manner without notice.		
Preliminary	First Production	Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design.		
No Identification Needed Full Production		Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.		
Obsolete	Not In Production	Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. The datasheet is for reference information only.
