

Detection of thick carton
Product accounting
Check out the broken or faulted tobacco rolling paper
Detecting if beer bottle is affixed with mark or not
Check out the broken strip from carding machine
Guard against restricted zone being invaded

Basic form: Infrared ray photoelectric switch
Working voltage: 2.90-250VAC 3.10-30VDC 4.12-240VDC/24-240VAC

Detection way:

- A: Diffused reflection type (scattered reflection type)
- B: Feedback reflection type mirror (mirror reflection type)
- C: Penetration type (correlation type)
- D: Marking detection type
- G: Optical fiber type

Detection distance: 05: 5cm 10: 10cm 30: 30cm 101: 10m

Output state:

- A: Normally open (light entering ON)
- B: Normally close (light sheltering ON)
- C: Normally open + Normally close

Subsidiary:

- T1: Front delay
- T2: Rear delay
- T: With aviation connector

Stord Electric
