

# HIGH SPEED NPN POWER TRANSISTORS

**GE13080T**  
**GE13081T**

**400-450 VOLTS**  
**8 AMP, 90 WATTS**

The GE13080T and GE13081T transistors are designed for high-voltage, high-speed power switching in inductive circuits where fall time is critical. They are particularly suited for line-operated switch-mode applications such as:

**Features:**

- Switching regulators
- Inverters
- Solenoid and relay drivers
- Motor controls
- Deflection circuits

**Fast Turn-Off Times:**

- 100 ns inductive fall time @ 25°C (Typ)
- 150 ns inductive crossover time @ 25°C (Typ)
- 400 ns inductive storage time @ 25°C (Typ)

Operating temperature range -65 to +150°C

100°C Performance Specified for:  
Switching times with inductive loads —  
Saturation voltages  
Leakage currents

maximum ratings ( $T_A = 25^\circ\text{C}$ ) (unless otherwise specified)
