

GS432

Adjustable Precision Shunt Regulators

Product Description

The GS432 is a 3 terminal adjustable voltage reference with specified thermal stability over applicable commercial temperature ranges.

Output voltage may be set to any value between V_{REF} (1.24V) and 16V with two external resistors (see Figure 2). When used with a photo-coupler, the GS432 is an ideal voltage reference in isolated feedback circuits for 1.24V to 16V switching-mode power supplies.

This device has a typical output impedance of 0.05Ω . Active output circuitry provides a very sharp turn-on characteristic, making the GS432 excellent replacements for zener diodes in many applications, including on-board regulation and adjustable power supplies.

Features

- Precise Reference Voltage to 1.240V
- Guaranteed 1% Reference Voltage Tolerance
- Sink Current Capability, 80 μ A to 100mA
- Quick Turn-on
- Adjustable Output Voltage, $V_O = V_{REF}$ to 16V
- 0.2 Ω Typical Output Impedance
- TO-92 and SOT-23 and SOT-89 Package

Applications

- Linear Regulators
- Adjustable Power Supplies
- Switching Power Supplies
