

# PNA-X Operation and Application Training Course Overview

Course Numbers:  
H7215X-100

## Gain a better understanding of the PNA-X product operation

### Course overview

This is a two-day course that provides an introduction to the PNA-X, basic network analyzer theory, PNA-X block diagram architecture, front panel navigation, and network analyzer calibration. Optional 1-day modules are also available to gain immediate benefits and experience on the many different measurement application capacities of the PNA-X network analyzer.

### What you will learn

- Functions of a network analyzer
- Front panel operations of the PNA-X
- Optional 1-day Modules:
  - Time Domain
  - Mixer Test
  - Amplifier Test

### Specifications

#### Course type

User training

#### Audience

Engineers new to the PNA-X

#### Prerequisites

Knowledge on RF and microwave fundamentals

#### Course length

Two day Basics

Four days with optional modules

#### Course format

Lecture with demos

### Detailed course agenda

#### Introduction

- Class overview and timeline
- What you can expect to learn
- What is a PNA-X

#### Network Analyzer Basics

- Light analogy
- S-parameters
- Basic network analyzer block diagram

#### PNA-X product overview

- Option list
- PNA-X block diagram
- Test set configurations
  - RF standard configuration
  - Forward/reverse measurements
  - Configuration options
  - Various configuration setups
  - Microwave standard configurations
  - Configuration options
  - Various configuration setups

#### Front Panel Overview

- Test methodology
- Hibernation
- Controlling the instrument
- Window
- Channels
- Traces
- Displays
- Markers
- Toolbars
- Printing

- Calibration sets and instrument states
- Recall states
- Path configuration function
- Help function

#### Calibration

- Measurement errors
- Calibration types
- Error models
- Calibration on the PNA-X
- Non-insertable devices
- New calibration features
  - Cal- Set Manager
  - Enhanced calibration wizard
  - Full 4-port calibration
  - Adapter- removal cal
  - Sliding- load cal
  - Multiple standards cal
  - Source power cal
  - Receiver power cal
  - Performance verification

#### Application (1 day optional module)

- Time Domain
- Mixer Test
- Amplifier Test

Quickly choose and use your test equipment solutions with confidence.

[www.agilent.com/find/open](http://www.agilent.com/find/open)

Agilent Open simplifies the process of connecting and programming test systems to help engineers design, validate and manufacture electronic products. Agilent offers open connectivity for a broad range of system-ready instruments, open industry software, PC-standard I/O and global support, which are combined to more easily integrate test system development.

LXI is the LAN-based successor to GPIB, providing faster, more efficient connectivity. Agilent is a founding member of the LXI consortium.

Windows® is a U.S. registered trademark of Microsoft Corporation.

## Remove all doubt

Our repair and calibration services will get your equipment back to you, performing like new, when promised. You will get full value out of your Agilent equipment throughout its lifetime. Your equipment will be serviced by Agilent-trained technicians using the latest factory calibration procedures, automated repair diagnostics and genuine parts. You will always have the utmost confidence in your measurements.

Agilent offers a wide range of additional expert test and measurement services for your equipment, including initial start-up assistance onsite education and training, as well as design, system integration, and project management.
