## HDD Interface Circuit

### Description

The HA16662MP/682MP monolithic IC is designed for ST-506 interface logics in hard disk drive memory systems.

### Functions

- RS-422 receiver, driver pair
- ST-506 interface line driver
- Line receiver with hysteresis input threshold
- ST-506 interface logic
- Two-channel supply voltage monitor circuit for 5 V and 12 V
- Reset signal generator for microprocessor
- Write gate signal and write fault signal generator for R/W amp. IC.

### Features

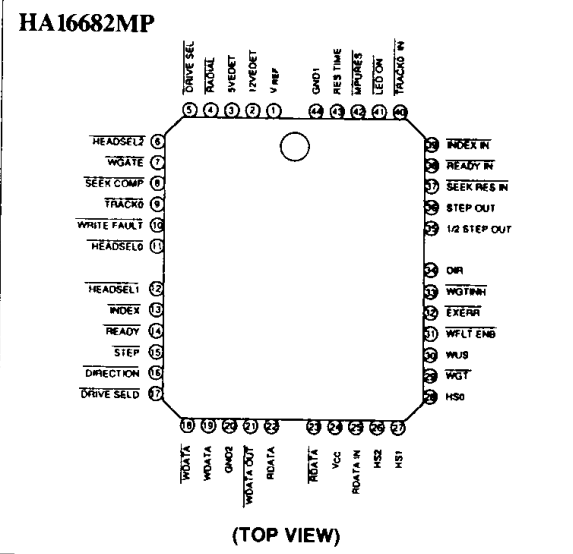

- Can directly connect with MPU: 6301V, 6301X, 6305V, 8049, etc.
- Reduces number of logic components for I/O interface
- No external TTLs and RS-422 receiver driver
- Write inhibit input for embedded servo system
- Highly reliable fail-safe with write inhibit functions for power-on period and abnormal supply voltage
- Small surface mount package (MSP: mini-square-package) for high density PCB

### Ordering Information

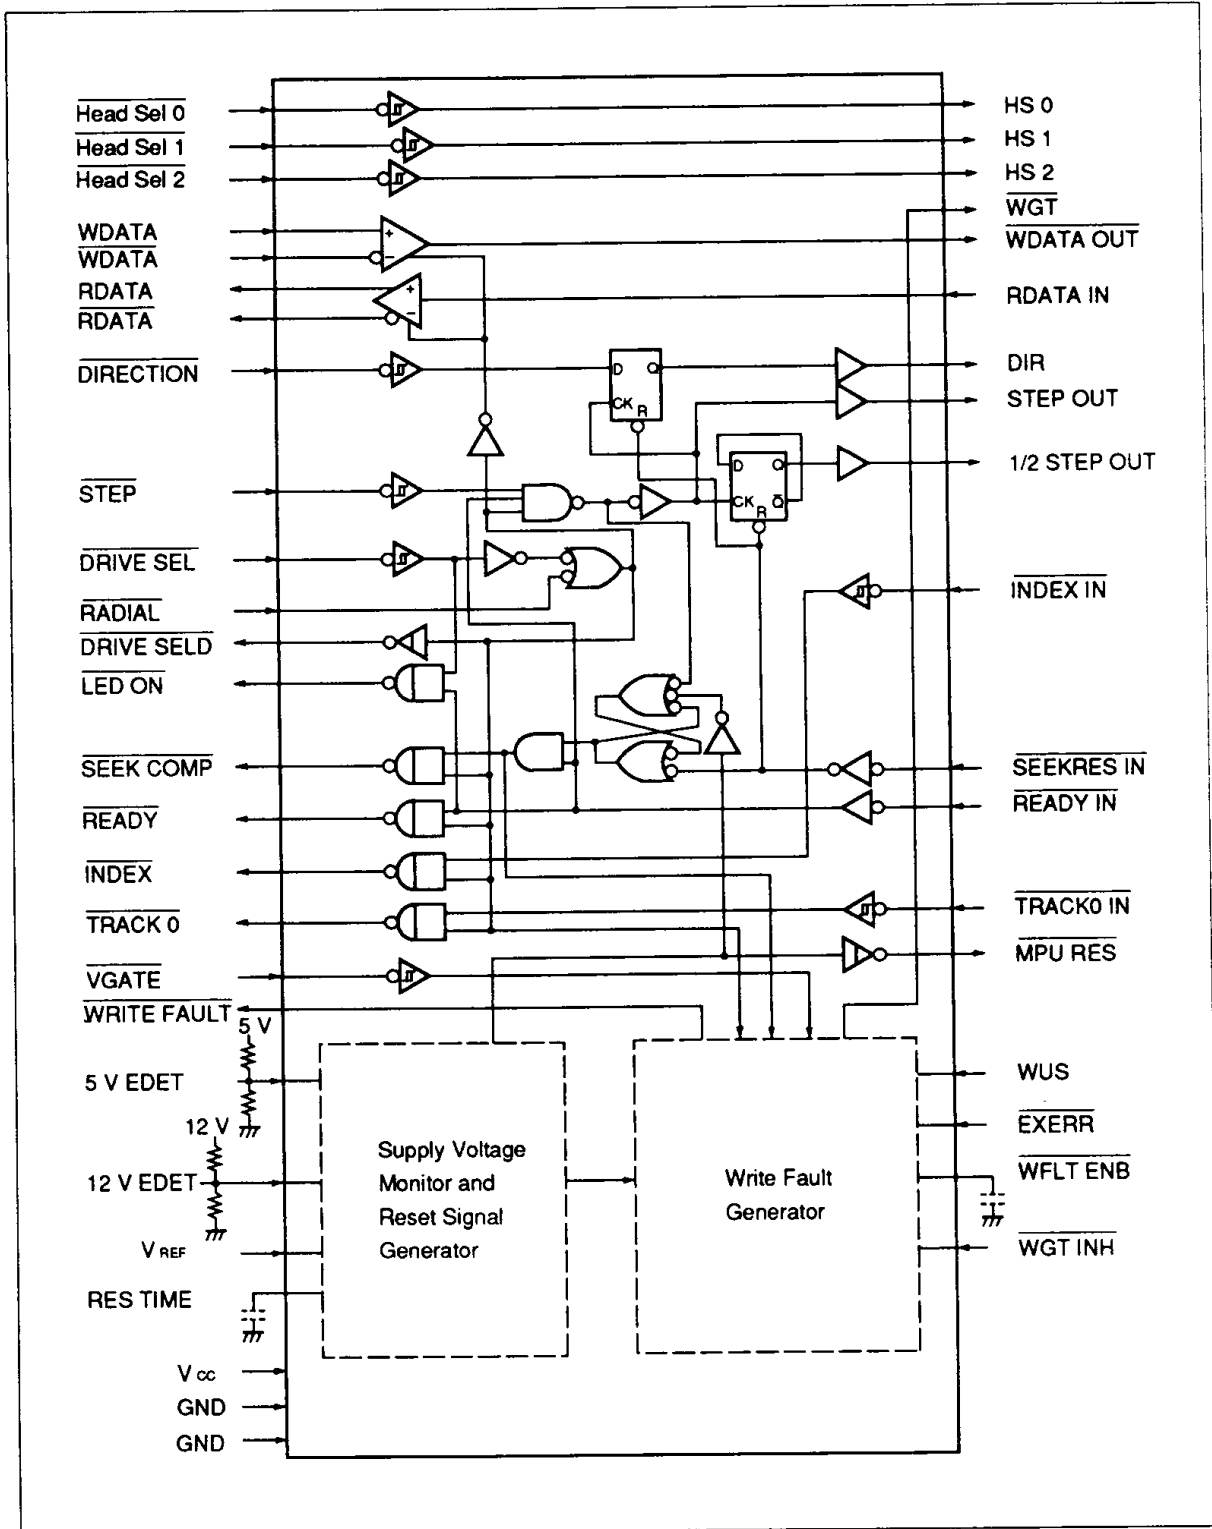

Type No.	Package
HA16662MP, HA16682MP	MP-44

### Pin Arrangement

## Absolute Maximum Ratings (Ta = 25°C)

Item	Symbol	Ratings	Unit	Notes
Supply voltage	VCC	7	V	
Input voltage 1	VIN1	7	V	1
Input voltage 2	VIN2	VCC	V	2
Differential input voltage	VDIN	±7	V	3
Output voltage 1	VOUT1	7	V	4
Output voltage 2	VOUT2	VCC	V	5
Differential output voltage	VDOUT	5.5	V	6
Output current 1	IOUT1	50	mA	7
Output current 2	IOUT2	10	mA	8
Output current 3	IOUT3	10	mA	9
Output current 4	IOUT4	-0.4	mA	10
Differential output current	IDOUT	30	mA	11
Operating temperature range	Topr	0 to +70	°C	
Storage temperature range	Tstg	-55 to +125	°C	
Power dissipation	PT	750	mW	

The absolute maximum ratings are limiting values, to be applied individually, beyond which the device may be permanently damaged. Functional operation under any of these conditions is not guaranteed. Exposing a circuit to its absolute maximum rating for extended periods of time may affect the device's reliability.

- Notes:
1. Applies to schmit-trigger inputs and other inputs equivalent to 74LS04:  
HEAD SEL 0 – HEAD SEL 2 DIRECTION, STEP, DRIVE SEL, TRACK 0 IN, INDEX IN, RDATAIN, SEEK RES IN, READYIN, WUS, EXERR, WGTINH, WGATE
  2. Applies to the following inputs:  
5 V EDET, 12 V EDET, VREF, RESTIME, WFLTENB, RADIAL
  3. Applies to the following differential receiver inputs:  
WDATA, WDATA
  4. Applies to the following open collector outputs in the off mode:  
DRIVESEL, LED ON, SEEK COMP, READY, INDEX, TRACK 0, WRITE FAULT, MPURES
  5. Applies to the following outputs when high:  
HS 0 - HS 2, WGT, WDATAOUT, DIR, STEP OUT, 1/2 STEP OUT
  6. Applies to the following differential driver outputs when high:  
RDATA, RDATA
  7. Applies to the following open collector outputs in the on mode:  
DRIVE SEL, LED ON, SEEK COMP, READY, INDEX, TRACK 0, WRITE FAULT
  8. Applies to the following open collector output in the on mode:  
MPURES
  9. Applies to the following outputs when low:  
HS 0 - HS 2, WGT, WDATA OUT, DIR, STEP OUT, 1/2 STEP OUT
  10. Applies to the same outputs as note 9 when high:
  11. Applies to the following differential driver outputs:  
RDATA, RDATA

## Electrical Characteristics (Ta = 25°C)

Item	Pin	Symbol	Min	Typ	Max	Unit	Test Condition
Supply voltage range		VCC	4.5	5.0	5.5	V
