
HD74AC165/HD74ACT165

Parallel-Load 8-bit Shift Register

HITACHI

Description

This 8-bit serial shift register shifts data from Q_A to Q_H when clocked, Parallel inputs to each stage are enabled by a low level at the Shift/Load Input. Also included is a gated clock input and a complementary output from the eighth bit.

Clocking is accomplished through a 2-input NOR gate permitting one input to be used as a clock inhibit function. Holding either of the clock inputs high inhibits clocking, and holding either clock input low with the Shift/Load input high enables the other clock input. Data transfer occurs on the positive going edge of the clock. Parallel loading is inhibited as long as the Shift/Load input is high. When taken low, data at the parallel inputs is loaded directly into the register independent of the state of the clock.

Features

- Outputs Source/Sink 24 mA
- HD74ACT165 has TTL-Compatible Inputs

HD74AC165/HD74ACT165

Pin Arrangement

Logic Symbol

Pin Names

A to H	Parallel Inputs
S_i	Serial Input
CP	Clock Input
S_L	Shift Load
$\overline{\text{Clock Inhibit}}$	Clock Inhibit
Q_H, \overline{Q}_H	Outputs

HITACHI

Truth Table

Inputs

S_L	$\overline{\text{Clock}}$		S_I	Parallel	Internal Outputs		Outputs
	Inhibit	CP		A H	Q_A	Q_B	Q_H
L	X	X	X	a h	a	b	h
H	L	L	X	X	$Q_{A\bar{D}}$	$Q_{B\bar{O}}$	$Q_{H\bar{O}}$
H	L		H	X	H	Q_{An}	Q_{Gn}
H	L		L	X	L	Q_{An}	Q_{Cn}
H	H	X	X	X	$Q_{A\bar{D}}$	$Q_{B\bar{O}}$	$Q_{H\bar{O}}$

H : High Voltage Level

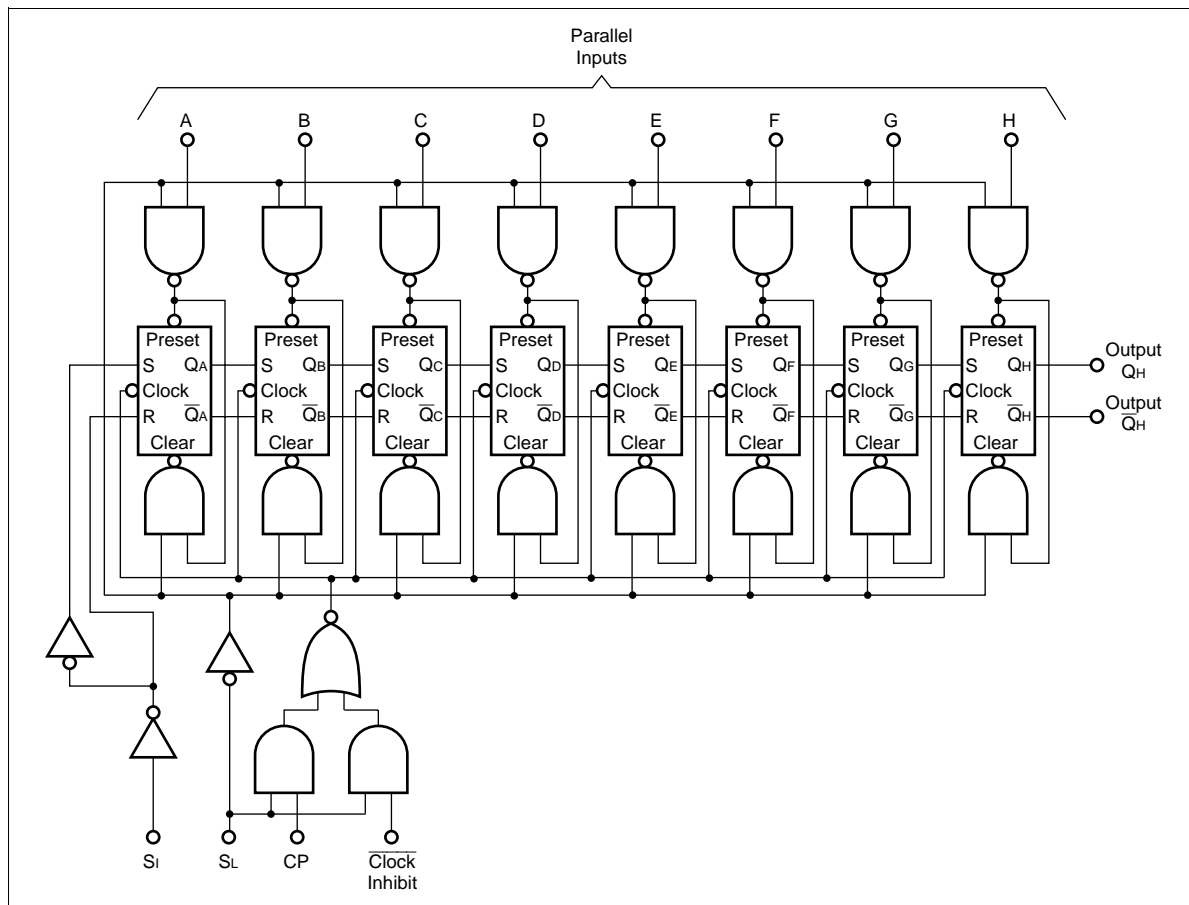

L : Low Voltage Level

X : Immaterial

 : Low-to-High Clock Transition

Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
