

## Dual 2-input NAND Gates

REJ03D0086-0300Z (Previous ADE-205-338B (Z)) Rev.3.00 Sep.22.2003

#### **Description**

The HD74LV2G00A has dual two-input NAND gates in an 8 pin package. Low voltage and high-speed operation is suitable for the battery powered products (e.g., notebook computers), and the low power consumption extends the battery life.

#### **Features**

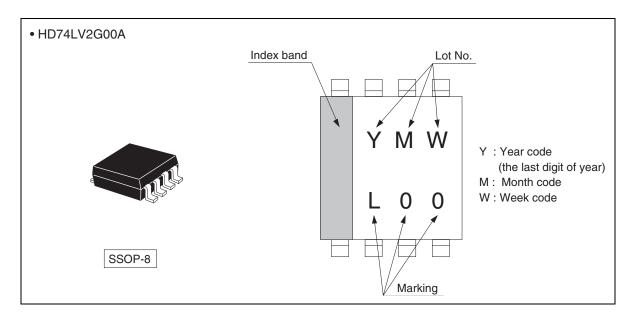

- The basic gate function is lined up as Renesas uni logic series.
- Supplied on emboss taping for high-speed automatic mounting.
- Electrical characteristics equivalent to the HD74LV00A Supply voltage range: 1.65 to 5.5 V
   Operating temperature range: -40 to +85°C
- All inputs  $V_{IH}$  (Max.) = 5.5 V (@ $V_{CC}$  = 0 V to 5.5 V) All outputs  $V_{O}$  (Max.) = 5.5 V (@ $V_{CC}$  = 0 V)
- Output current  $\pm 6$  mA (@V<sub>CC</sub> = 3.0 V to 3.6 V),  $\pm 12$  mA (@V<sub>CC</sub> = 4.5 V to 5.5 V)
- All the logical input has hysteresis voltage for the slow transition.
- Ordering Information

| Part Name      | Package Type | Package Code | Package<br>Abbreviation | Taping Abbreviation (Quantity) |
|----------------|--------------|--------------|-------------------------|--------------------------------|
| HD74LV2G00AUSE | SSOP-8 pin   | TTP-8DBV     | US                      | E (3,000 pcs/reel)             |

|--|-------------------------------------|--------------------------|------|-----------------------------|
| Supply voltage range                                     | V <sub>CC</sub>                     | -0.5 to 7.0              | V    |                             |
| Input voltage range *1                                   | VI                                  | -0.5 to 7.0              | V    |                             |
| Output voltage range *1, 2                               | Vo                                  | $-0.5$ to $V_{CC} + 0.5$ | V    | Output : H or L             |
|  |                                     | -0.5 to 7.0              |      | V <sub>CC</sub> : OFF       |
| Input clamp current                                      | I <sub>IK</sub>                     | -20                      | mA   | V <sub>I</sub> < 0          |
| Output clamp current                                     | I <sub>OK</sub>                     | ±50                      | mA   | $V_O < 0$ or $V_O > V_{CC}$ |
| Continuous output current                                | Io                                  | ±25                      | mA   | $V_{O} = 0$ to $V_{CC}$     |
| Continuous current through V <sub>CC</sub> or GND        | I <sub>CC</sub> or I <sub>GND</sub> | ±50                      | mA   |                             |
| Maximum power dissipation at Ta = 25°C (in still air) *3 | P <sub>T</sub>                      | 200                      | mW   |                             |
| Storage temperature                                      | Tstg                                | -65 to 150               | °C   |                             |

Notes:

- The absolute maximum ratings are values, which must not individually be exceeded, and furthermore no two of which may be realized at the same time.
- 1. The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.
- 2. This value is limited to 5.5 V maximum.
- 3. The maximum package power dissipation was calculated using a junction temperature of 150°C.

### **Recommended Operating Conditions**

| Item                               | Symbol          | Min  | Max | Unit   | Conditions                                 |

Keep safety first in your circuit designs!

The pastery in a survival circula designs; and the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.

Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

- Notes regarding these materials

  1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.

  2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.

  3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.

  The information described here may contain technical inaccuracies or typographical errors.

  Renesas Technology Corp. assumes no responsibility for any damage, liability, or other loss resident product product of the responsibility of the information of the Renesas Technology Corp. Semiconductor home page (http://www.renesas.com).

  4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.

  5. Renesas Technology Corp. semiconductors are not designed or manufactured for use in a device or system that is used under circumstances i
- use.

  6. The prior written approval of Renesas Technology Corp. is necessary to reprint or reproduce in whole or in part these materials.

  7. If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination.

  Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.

  8. Please contact Renesas Technology Corp. for further details on these materials or the products contained therein.
