# **SPECIFICATION**

PRODUCT: SAW FILTER

MODEL: HDMIF389A1T

SHOULDER ELECTRONICS LIMITED

### 1.SCOPE

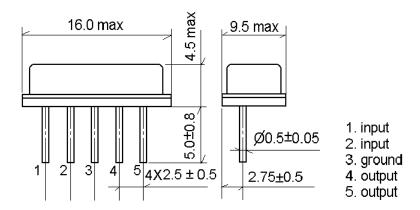

SHOULDER'S SAW filter series have broad line up products meeting all broadcast standard including NTSC,PAL and SECAM systems. These filters are composed of two interdigital transducers on a single-crystal. piezoelectrical chip. they are used in electronic equipments such as TV and so on.

## 2.Construction

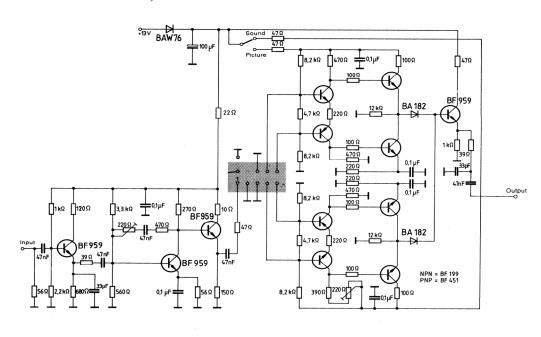

#### 2.1 Dimension and materials

Manufacturer's name: SHOULDER ELECTRONICS Co. LTD(CHINA)

Type: MIF389A1T

#### 2.2. Circuit construction, measurement circuit

Test circuit for DIP-10 filter Input impedance of the symmetrical post-amplifier: 2 k $\Omega$  in parallel with 5 pF

# 3. Characteristics

| Items                                 | Conditions  | Specifications            |
|---------------------------------------|---|---------------------------|
| Standard<br>atmospheric<br>conditions | Unless otherwise specified, the standard rang of atmospheric conditions for making measurements and tests is as follows;  Ambient temperature : 15°C to 35°C  Relative humidity : 25% to 85%  Air pressure : 86kPa to 106kPa  |                           |
| Operating temperature rang            | Operating temperature rang is the rang of ambient temperatures in which the filter can be operated continuously. $-10^{\circ}\text{C} \sim +60^{\circ}\text{C}$   | There shall be no damage. |
| Storage temperature rang              | Storage temperature rang is the rang of ambient temperatures at which the filter can be stored without damage.  Conditions are as specified elsewhere in these specifications. $-40^{\circ}\text{C} \sim +70^{\circ}\text{C}$ |                           |
| Reference temperature                 | +25℃  |                           |

## 3.1 Maximum Rating

| DC voltage | VDC | 12 | V | Between any terminals |
|------------|-----|----|---|-----------------------|
| AC voltage | Vpp | 10 | V | Between any terminals |

## **3.2 Electrical Characteristics**

Characteristics in M/N mode (switching input pin 2 connected to input 1)

Source impedance  $Zs=50 \Omega$ 

Load impedance  $Z_L=2k~\Omega//3pF$   $T_A=25~C$ 

|                            | iance  | ZL-2K // 5P1 |      |      |       | 1 A-23 C |
|----------------------------|--------|--------------|------|------|-------|----------|
| Iten                       | 1      | Freq         | min  | typ  | max   |          |
| Insertion att<br>Reference |        | 37.40MHz     | 14.3 | 16.3 | 18.3  | dB       |
|                            |        | 38.90MHz     | 4.2  | 5.7  | 7.2   | dB       |
| Relative attenuation       |        | 35.32MHz     | 0.1  | 1.6  | 3.1   | dB       |
|                            |        | 34.40MHz     | 15.6 | 17.6 | 19.6  | dB       |
|                            |        | 32.90MHz     | 42.0 | 51.0 | -     | dB       |
|                            |        | 40.40MHz     | 40.0 | 47.0 | -     | dB       |
| Sidelobe 25.00~3           |        | 32.90MHz     | 35.0 | 44.0 |       | dB       |
| Sidelobe                   | 40.40~ | 45.00MHz     | 35.0 | 43.0 |       | dB       |
| Temperature coefficient    |        |              | -72  |      | ppm/k |          |

## Characteristics in B/G mode (switching input pin 2 connected to ground ) $\,$

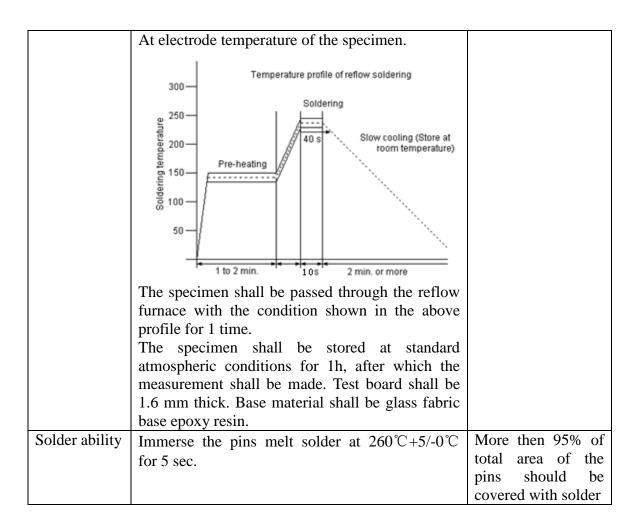

Source impedance  $Z_S=50 \Omega$ 

Load impedance  $Z_L=2k\ \Omega\ //3pF$   $T_A=25\ ^{\circ}C$ 

| Iten                                  | 1      | Freq     | min  | Тур  | max   |    |
|---------------------------------------|--------|----------|------|------|-------|----|
| Insertion attenuation Reference level |        | 37.40MHz | 14.5 | 16.5 | 18.5  | dB |
|                                       |        | 38.90MHz | 4.1  | 5.6  | 7.1   | dB |
|                                       |        |          | -1.3 | 0.2  | 1.7   | dB |
| Relative attenuation                  |        | 32.40MHz | 15.7 | 17.7 | 19.2  | dB |
|                                       |        | 33.40MHz | 14.5 | 16.5 | 18.5  | dB |
|                                       |        | 30.90MHz | 40.0 | 50.0 | -     | dB |
|                                       |        | 40.40MHz | 40.0 | 48.0 | -     | dB |
| Sidelobe 25.00~3                      |        | 30.90MHz | 35.0 | 44.0 |       | dB |
| Sidelobe                              | 40.40~ | 45.00MHz | 32.0 | 39.0 |       | dB |
| Temperature coefficient               |        |          | -72  |      | ppm/k |    |

## **3.3** Environmental Performance Characteristics

| Item           | Condition   | 1   | Specifications      |  |  |
|----------------|---|---|---------------------|--|--|
| High           | The specimen shall be store   | specimen shall be store at a temperature of |                     |  |  |
| temperature    | $80\pm2$ °C for 96 $\pm4$ h. Then it s  | for 96±4h. Then it shall be subjected to    |                     |  |  |
|                | standard atmospheric condit   | d atmospheric conditions for 1h, after      |                     |  |  |
|                | which measurement shall be n  | made within 1h.                             |                     |  |  |
| Low            | The specimen shall be store   | at a temperature of                         |                     |  |  |
| temperature    | -20±3℃ for 96±4h. Then it   | shall be subjected to                       |                     |  |  |
|                | standard atmospheric condit   | tions for 1h, after                         |                     |  |  |
|                | which measurement shall be n  | made within 1h.                             |                     |  |  |
| Humidity       | The specimen shall be store   | at a temperature of                         |                     |  |  |
|                | 40±2°C with relative humidi   | ity of 90% to 96%                           |                     |  |  |
|                | for 96±4h. Then it shall be s   | subjected to standard                       |                     |  |  |
|                | atmospheric conditions for  | 1h, after which                             |                     |  |  |
|                | measurement shall be made w   | ithin 1h.                                   | Mechanical          |  |  |
| Thermal        | The specimen shall be subject   | characteristics and                         |                     |  |  |
| shock          | cycles each as shown below  | specifications in                           |                     |  |  |
|                | subjected to standard atmosp  | electrical                                  |                     |  |  |
|                | 1h, after which measurement shall be made characteristics shall be satisfied. There |   |                     |  |  |
|                | within 1h.  | shall be no                                 |                     |  |  |
|                | 1   | Duration                                    | excessive change in |  |  |
