MORNSUN[®]

1W isolated DC-DC converter with Fixed Input Voltage and Regulated Single Output

Continuous Short Circuit Protection

Patent Protection RoHS

FEATURES

- Continuous short-circuit protection
- High efficiency up to 75%
- Operating ambient temperature range -40°C to **+85**℃
- I/O isolation test voltage 1.5k VDC
- Miniature SMD package
- No external components required
- Industry standard pin-out
- EN60950 Approval

IB_XT-1WR2 series are especially designed for distributed power supply systems where an isolated voltage is required with the following application characteristics:

1. The voltage to the input of the power supply is relatively stable with a variation of ±5% Vin nominal;

2. Input to Output isolation of up to 1500VDC is necessary;

3. Applications with a tight line and load regulation requirement combined with low ripple & noise on the output.

Design Reference

1. Typical application

Input and/or output ripple can be further reduced, by connecting a filter capacitor from the input and/or output terminals to ground as shown in Fig.2.

Choosing suitable filter capacitor values is very important for a smooth operation of the modules, particularly to avoid start-up problems caused by capacitor values that are too high. For recommended input and output capacitor values refer to Table 1.

2. EMC compliance circuit

Table 1: Recommended input and output capacitor values					
Vin(VDC)	Cin(µF)	Vo (VDC)	Cout(µF)		
5	4.7	3.3/5	10		
12	2.2	12	2.2		
24	1	15	1		

It is not recommended to connect any external capacitor when output power is less than 0.5W.

Table 2: Recommended EMC filter values

Input voltage (V)		5/12/24
	C1	4.7µF /50V
EMI	C2	Refer to the Cout in Fig.2
	LDM	6.8µH

3. Minimum Output load requirements

For a reliable and efficient operation of the converter, the minimum load should never be less than 10% of the rated output load. If the total required output power is below 10%, a parallel bleeding resistor is required on the output, ensuring that the sum of the power consumption is always maintained at 10% minimum.

- 1. For additional information on Product Packaging please refer to <u>www.mornsun-power.com</u>. Packaging bag number 58210023;
- If the product is not operated within the required load range, the product performance cannot be guaranteed to comply with all 2. parameters in the datasheet;
- The maximum capacitive load offered were tested at input voltage range and full load; 3.
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75%RH with nominal 4. input voltage and rated output load;
- All index testing methods in this datasheet are based on our Company's corporate standards; 5.
- The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model products 6. will exceed the above-mentioned requirements, and please directly contact our technicians for specific information;
- 7. We can provide product customization service, please contact our technicians directly for specific information;
- Products are related to laws and regulations: see "Features" and "EMC"; 8.
- Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by 9. qualified units.
