DESCRIPTION:

The IDT54/74FCT299T/AT/CT are built using an advanced dual metal CMOS technology. The IDT54/74FCT299T/AT/CT are 8-input universal shift/storage registers with 3-state outputs. Four modes of operation are possible: hold (store), shift left, shift right and load data. The parallel load inputs and flip-flop outputs are multiplexed to reduce the total number of package pins. Additional outputs are provided for flip-flops Q_0 and Q_7 to allow easy serial cascading. A separate active LOW Master Reset is used to reset the register.
