
TV-processor with radio channel, keys and decoder functions for LCD TV applications

General description

The ILA8890/91 are front-end TV-processors, which are provide

- Audio & video IF signal processing
- Line and frame synchronization signals forming
- Audio/video input/output switching.
- Chroma & luminance signals forming
- Multi standard color decoding PAL, NTSC, SECAM (only for ILA8891).
- One line duration delay of chroma signal (only for ILA8891)
- YPRPB signals forming for PIP function processing. (only for ILA8891)

Main features:

- supply voltage 4,7 ... 5,3 V (nominal value 5,0 V);
- audio part supply voltage 5; 8 V;
- consumption current 85 mA;
- total power dissipation 540 mW;
- output demodulated video signal swing

The ILA8890/91 are performed in 80-pin plastic package MO-112 CB-2
