Specification of INANBO-T28-SPFD5408-V11

Mechanical Specification

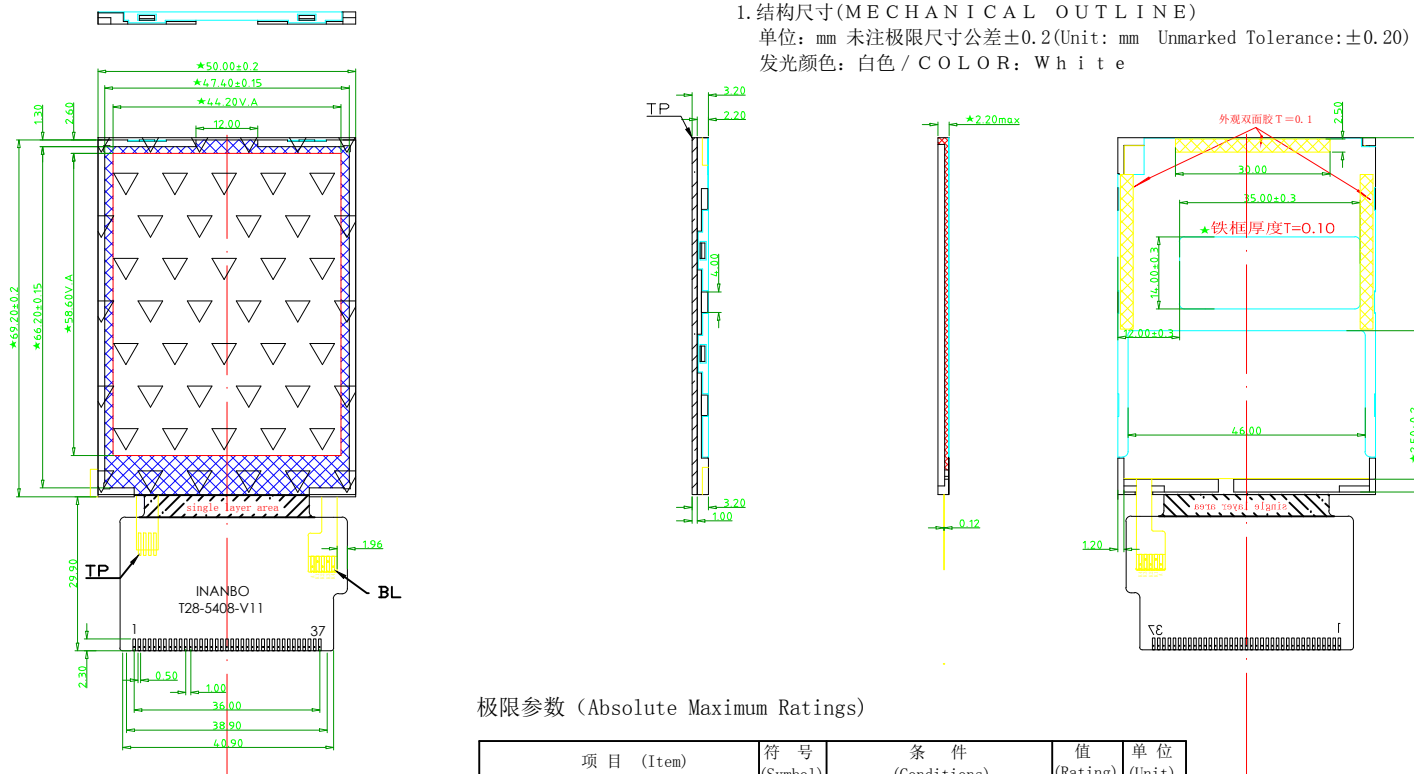

Item	Standard Value	Unit
Display size	2.8	inch
Module Dimension	H/W/D 69.2×50 ×4.2	mm
Active Area	W/H 43.2×57.6	mm
Number of Dots	W/RGB/H 240×3×320	Dot
Pixel size	W/H 0.18×0.18	mm
LCD Type	TFT/ Transmissive / Negative	-
Driving IC	SPFD5408(8BIT/16BIT)	
Approx. Weight	TBD	g
Various color Display	65K 262K	
Backlight Color	White

Notes :

- Contrast Ratio(CR) is defined mathematically as :

Contrast Ratio = $\frac{\text{Surface Luminance with all white pixels}}{\text{Surface Luminance with all black pixels}}$

- Surface luminance is the center point across the LCD surface 500mm from the surface with all pixels displaying white. For more information see FIG 1.

- Response time is the time required for the display to transition from to black(Rise Time, TrR) and from black to white(Decay Time, TrD). For additional information see FIG 3.
- Viewing angle is the angle at which the contrast ratio is greater than 10. The angles are determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the LCD surface. For more information see FIG 5.
- Optimum contrast is obtained by adjusting the LCD Threshold voltage(Vth & Vsat)

FIG. 3 The definition of Response Time

The response time is defined as the following figure and shall be measured by switching the input signal for “black” and “white”.

General Precautions

Safety

Liquid crystal is poisonous. Do not put it in your mouth. If liquid crystal touches your skin or clothes, wash it off immediately by using soap and water.

Handling

- 1.The LCD panel is plate glass. Do not subject the panel to mechanical shock or to excessive force on its surface.
- 2.The polarizer attached to the display is easily damaged. Please handle it carefully to avoid scratch or other damages.
- 3.To avoid contamination on the display surface, do not touch the module surface with bare hands.
- 4.Keep a space so that the LCD panels do not touch other components.
- 5.Put cover board such as acrylic board on the surface of LCD panel to protect panel from damages.
- 6.Transparent electrodes may be disconnected if you use the LCD panel under environmental conditions where the condensation of dew occurs.
- 7.Do not leave module in direct sunlight to avoid malfunction of the ICs.

Static Electricity

- 1.Be sure to ground module before turning on power or operating module.
- 2.Do not apply voltage which exceeds the absolute maximum rating value.

Storage

- 1.Store the module in a dark room where must keep at 25 }10 and 65%RH or less.
- 2.Do not store the module in surroundings containing organic solvent or corrosive gas.
- 3.Store the module in an anti-electrostatic container or bag.

Cleaning

1. Do not wipe the polarizer with dry cloth. It might cause scratch.
- 2.Only use a soft sloth with IPA to wipe the polarizer, other chemicals might permanent damage to the polarizer.
