

Features

- PFC, ballast control and half-bridge driver in one IC
- Critical-conduction mode boost-type PFC
- Internal VBUS sensing and regulation
- Internal PFC loop compensation
- Programmable PFC over-current
- Ignition voltage regulation (current or voltage control)
- Half-bridge non-ZVS protection
- Half-bridge over-current protection using low-side MOSFET $R_{ds(on)}$
- Programmable preheat time
- Programmable preheat frequency
- Programmable ignition ramp time
- Programmable run frequency
- Voltage-controlled oscillator (VCO) analog input
- Latched EOL window comparator on VCC
- Internal EOL fault timer
- Fixed dead-time (1.7 μ sec typ.)
- DC bus under-voltage reset
- Lamp insert auto-restart
- Micro-power start-up current
- Under-voltage lock-out mode
- Small 8-pin SOIC package
- Lead-free

Product Summary

| | |
|-------------------------------|---------------------|
| Topology | Boost + Half-Bridge |
| V_{OFFSET} | 600 V |
| V_{OUT} | VCC |
| I_{O+} & I_{O-} (typical) | 180 mA & 260 mA |
| Dead-time | 1.7 μ s |

Package Options

Typical Application

- Electronic Ballast
