Before Initial Use

Thank you for purchasing your new Panasonic digital cordless telephone.

Dear purchaser,

You have acquired a KX-TCD410NZ, which is a product made in regard with the European Standards for Cordless Telephones (DECT). DECT technology is characterized by high-security protection against interceptions as well as high-quality digital transmission. This telephone was designed for a wide range of applications. For example, this telephone can be used within a network of base units and handsets, constituting a telephone system which:

- operates up to 6 handsets at one base unit.
- allows an intercom between 2 handsets.
- allows the operation of a handset at up to 4 base units, expanding the communication radio area.

Caller ID Service, where available, is a telephone company service. After subscribing to Caller ID, this phone will display the caller's phone number.

General Warning:

The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

Important Information

Only use the power supply included with the product.

Do not connect the AC Adaptor to any AC outlet other than the standard AC230V.

The apparatus is approved for use with PQLV19AL power supply.

This apparatus is unable to make emergency telephone calls under the following conditions:

- The portable handset batteries need recharging, or have failed.
- During a mains power failure.
- When the Key Lock is set to ON.
- When the unit is in Direct Call mode.

Do not open the base unit or handset (other than to change the batteries).

This apparatus should not be used near emergency/intensive care medical equipment and should not be used by people with pacemakers.

Care should be taken that objects do not fall onto, and liquids are not spilled into the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration or shock.

Environment

Do not use this unit near water.

This unit should be kept away from heat sources such as radiators, cookers, etc. It should also not be placed in rooms where the temperature is less than 5°C or greater than 40°C.

The AC Adaptor is used as the main disconnect device, ensure that the AC outlet is located/installed near the unit and is accessible.

WARNING:

TO PREVENT THE RISK OF ELECTRICAL SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY OTHER TYPE OF MOISTURE.

Battery Caution

Use only specified batteries.

Only use rechargeable batteries.

Do not mix old and new batteries.

Do not dispose of batteries in a fire, they may explode.

Check local waste management codes for special disposal instructions.

Do not open or mutilate the batteries.

Released electrolyte is corrosive and may cause burns or injury to the eyes or skin.

The electrolyte may be toxic if swallowed.

Exercise care in handling the batteries in order not to short the batteries with conductive materials such as rings, bracelets and keys.

The batteries and/or conductor may overheat and cause burns.

Charge the batteries provided in accordance with the information given in this operating guide.

Location

- For maximum distance noise-free operation, place your base unit:
 - Away from electrical appliances such as TV, radio, personal computer or another phone.
 - In a convenient high and central location.

Safety Caution

The ringer tone is reproduced through the earpiece. To avoid damage to hearing, first answer the call, then hold the phone to the ear.

Setting up

◆◆ Connection

Plug in the AC adaptor and the telephone line cord in order **1, 2, 3, 4**.

Fasten the AC adaptor cord to prevent it from being disconnected.

The AC adaptor must remain connected at all times (It is normal for the adaptor to feel warm during use).

- Never install telephone wiring during a lightning storm.

◆◆ Battery Installation

Please ensure the batteries are inserted as shown. ⊖ part should be inserted first. Close the cover as indicated by the arrow.

- When you replace the batteries, ⊕ part should be removed first.

To replace the battery:

Press the notch on the cover firmly and slide it as indicated by the arrow. Replace 2 batteries and close the cover then charge the handset for about 7 hours.

◆◆ Battery Charge

At the time of shipment, the batteries are not charged. To charge, place the handset on the base unit. **Please charge the batteries for about 7 hours before initial use.** During charging, the battery icon is as shown below.

Fully charged

During charging

| Display icon | Battery strength |
|--------------|---------------------|
| | High |
| | Medium |
| | Low |
| | Needs to be charged |

The handset, when powered off will be turned on automatically when it is placed on the base unit.

In normal use, the handset and the base unit should be powered on at all times.

◆◆ Battery Life

Battery life is dependent on use and conditions but in general when using fully charged Ni-MH batteries (700 mAh):

Talk time: 10hrs approx.

Standby time: 120hrs approx.

When using Ni-Cd batteries (250 mAh):

Talk time: 4hrs approx.

Standby time: 40hrs approx.

(Times indicated are for peak performance.)

The batteries reach peak performance after several full charge/discharge cycles. The batteries cannot be overcharged unless they are repeatedly removed and replaced.

If battery life is shortened then please check that battery and charge terminals are clean.

For maximum battery life, it is recommended that the handset is not recharged until battery icon flashes .

◆◆ Caller ID Service

Caller ID is a service of your Network provider and will only operate if you have subscribed to this feature.

After subscribing to Caller ID, this phone will display the caller information.

If your unit is connected to a PBX or a telephone line that does not support this service, you will not be able to use it.

Caller ID does not display caller information while using the handset for an intercom call. However, the caller information will be stored to the Caller ID List.

For all local and national incoming calls put, your display will show the area code (e.g. 09 for Auckland) or the cellular prefix (e.g. 025 for Telecom Cellular) followed by the caller's telephone number. An Auckland caller's number will be displayed as 09XXXXXXXX. The seven X's represent the seven digits of the caller's telephone number. A call from a 7-digit Telecom Cellular number will be displayed as 025XXXXXXXX. For incoming international calls put, your display may only show the digits "0000". For business users on a Centrex line, your display will show the Centrex extension numbers in the shorter extension number format used within your company.

Call Waiting: Call Waiting is a service of your Network provider and will only operate if you have subscribed to this service.

You can answer the second call, keeping the first call on hold.

Please consult your Network provider for details of this service.

◆◆ For Using Telecom's or Another Company's Toll Services

Your telephone company may charge you for a local call if the number dialled has the area code prefix included. If the charge for local call is unacceptable, only the 7-digits of the local number should be dialled from your telephone. Do not dial the "0" prefix or the area code digit.

Caller ID

◆◆ Caller ID Display

When receiving a call, the display shows its phone number.

◆◆ REGISTRATION : Handset Registration to a Base Unit

Handset Registration

The handset supplied with the base unit is already registered. If an optional handset is purchased, it must be registered. Additional **KX-A142NZ** handsets are available to purchase separately. Up to 6 handsets can be registered to a single base unit. Using additional handsets allows you to have an intercom call while simultaneously conducting a call to an outside line.

Handset must be registered within 1 minute after pressing **PAGE** button. If over 1 minute, press  then start over again.

Charge the optional handset batteries for 7 hours before initial use.

| | | | |
|--|--|--|--|

Multi-unit User Operation

◆◆ SELECT BS : Base Unit Selection

When Automatic Base Unit Access is selected, if you move outside of the radio range of the current base unit the handset automatically searches for other registered bases. When a specified base unit is selected, the handset will access that base unit only. Calls (both incoming and outgoing) can be conducted only via the selected base unit, even if the radio cells overlap with neighbouring base units.

| | | | |
|--|--|--|--|
| 1  | 2  | 3  | 4  |
| Press MENU . | Search/Select "SETTING HS". | Search/Select "SELECT BS". | Search/Select "AUTO" or specific base unit number. |

- To exit the operation, press  any time.

Operating Additional Base Units: You can register and operate your handset with up to 4 base units. Each base unit forms 1 radio cell. If the individual bases are linked to the same telephone line then you can extend the operating range of the system by positioning the bases so that the two radio cells overlap. If the handset is set to AUTO base selection, then in standby mode the handset will automatically swap to the second base if the range on the first base is exceeded. It is not possible to transfer calls between bases (only between handsets linked to the same base unit).

Note: Calls are disconnected when the handset moves from one radio cell to another.

Intercom between Handsets

You can use your handsets as a 2-way intercom.

For example, when Handset 1 calls Handset 2. To hang up, press .

- Intercom calls can be conducted within the radio cell of the current base unit, but not with units in neighbouring radio areas.

Transferring a Call to Another Handset/Conference Call

The Intercom can be used during a call to transfer an external call between handsets that are registered to the same base unit. For example, when handset 1 transfers a call to Handset 2. To hang up, press .

^{*1} You can also press any dialling button, **INTERCOM**, **#** or *****.

^{*2} If you press  after pressing desired handset number, a call can be transferred to another handset without speaking to another handset.

If the transferred call is not answered within 30 seconds, Handset 1 will ring again.

^{*3} When Handset 2 answers a call transferred, press  to complete a call transfer or press dialling button  to establish the conference call.

Before Requesting Help

If you experience any problems with the normal use of your apparatus, you should unplug it from the telephone outlet and connect a known working telephone in its place. If the known working telephone still has problems, then please contact the customer service department of your Network provider.

If it operates correctly, then the problem is likely to be a fault in your apparatus.

In this case, contact your supplier for advice. Your Network provider may charge you if they attend a service call that is not due to apparatus supplied by them.
