

KYL-FSK1 100m Transmitter

Technical Parameter:

Working voltage: DC3-12V

Working frequency: 315、433.92MHz (Other frequency can be customized)

Stand-by current: 0mA

Working current: 6-12mA

Encoded mode: Fixed code、Rolling code

Transmitting distance: >100m (Receiving sensitivity is above -103dBm)

Output power: 10dBm (10mW)

Transmitting speed: <10Kbps

Modulation Method: Amplitude modulation (OOK)

Working temperature: -10℃~+70℃

Size: 41×20×9mm

Diagrammatic introduction of pin (From left to right)

Pin	Name	Function
1	VCC	anode
2、3	GND	cathode
4	ANT	antenna terminal

Frame size diagram(mm):
