
Multifunction voltage regulator for car radio

Features

- Four outputs:
 - 8.5V @ 500mA
 - 5V @ 300mA Permanent
 - 5V @ 800mA
 - 3.3V @ 800mA
- 2A high side driver
- Reset function
- Ignition comparator
- Load dump protection
- Thermal shutdown
- Overcurrent limitation
- All pins ESD protected

Description

The L5956 contains a triple voltage regulator and a power switch.

The IC includes a monitoring circuit for detection.

The IC features a very low quiescent under stand-by.

4 Package information

In order to meet environmental requirements, ST offers this device in ECOPACK[®] packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark.

ECOPACK specifications are available at: www.st.com.
