LA7911**TV Tuner Controller**

The LA7911 is a tuner controller IC having such functions as band switch, inverter, low-pass filter, 33V reference Zener. It can be used for frequency synthesizer or voltage synthesizer according to external application.

Functions

- Band switch (Equivalent to LA7900, LA7910 : Refer to the truth table.)
- Inverter
- Low-pass filter (Voltage follower, operational amplifier)
- 33V reference Zener

Features

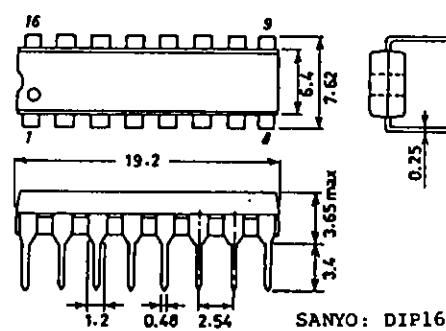

- 2-input 5-output band switch.
- Band switches of 2 types (LA7900 type or LA7910 type) available by changing over C pin.
- Large maximum output current and small saturation voltage.
- Meets CATV tuner requirements.
- Usable for frequency synthesizer or voltage synthesizer by changing connection of inverter and operational amplifier.
