

Bias Resistor Transistor

PNP Silicon Surface Mount Transistor with Monolithic Bias Resistor Network

- Applications

Inverter, Interface, Driver

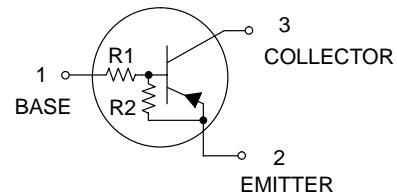

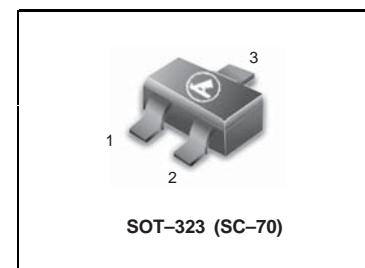

- Features

- 1) Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
 - 2) The bias resistors consist of thin-film resistors with complete isolation to allow positive biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
 - 3) Only the on/off conditions need to be set for operation, making the device design easy.
- We declare that the material of product compliance with RoHS requirements.
 - S- Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q101 Qualified and PPAP Capable.

● Absolute maximum ratings (Ta=25°C)

Parameter	Symbol	Limits		Unit
Supply voltage	V _{cc}	-50		V
Input voltage	V _{in}	-10 to +5		V
Output current	I _c	-500		mA
Power dissipation	P _d	200		mW
Junction temperature	T _j	150		°C
Storage temperature	T _{stg}	-55 to +150		°C
