

Damper actuator for operating air control dampers in ventilation and air-conditioning systems for building services installations

- For air control dampers up to approx. 1 m²
- Torque 5 Nm
- Nominal voltage AC 100 ... 240 V
- Control: Open-close or 3-point
- Integrated auxiliary switch

Technical data

Electrical data	Nominal voltage	AC 100 ... 240 V, 50/60 Hz
	Nominal voltage range	AC 85 ... 265 V
	Power consumption	In operation 1.5 W @ nominal torque At rest 0.4 W For wire sizing 4 VA
	Auxiliary switch	1 x SPDT, 1 mA ... 3 (0.5) A, AC 250 V ☐ (0 ... 100% adjustable)
Functional data	Connection Motor	Terminals 4 mm ² (Cable Ø 6 ... 8 mm, three-core)
	Auxiliary switch	Terminals 4 mm ² (Cable Ø 6 ... 8 mm, three-core)
	Torque (nominal torque)	Min. 5 Nm @ nominal voltage
	Direction of rotation	Reversible with switch 0 ↺ or 1 ↻
	Manual override	Gearing latch disengaged with pushbutton, detentable
	Angle of rotation	Max. 95°↔, limited on both sides by means of adjustable, mechanical end stops
	Running time	150 s / 90°↔
	Sound power level	Max. 35 dB (A)
	Position indication	Mechanical, pluggable
	Maintenance	Maintenance-free
Safety	Protection class	II Totally insulated ☐
	Degree of protection	IP54 in any mounting position
	EMC	CE according to 89/336/EEC
	Low voltage directive	CE according to 73/23/EEC
	Mode of operation	Type 1B (to EN 60730-1)
	Rated impulse voltage	4 kV (to EN 60730-1)
	Control Pollution Degree	3 (to EN 60730-1)
	Ambient temperature range	-30 ... +50 °C
	Non-operating temperature	-40 ... +80 °C
	Ambient humidity range	95% r.H., non-condensating (to EN 60730-1)
Dimensions / Weight	Dimensions	See «Dimensions» on page 2
	Weight	Approx. 600 g

Safety notes

- The damper actuator is not allowed to be used outside the specified field of application, especially in aircraft or any other form of air transport.
- Caution: Power supply voltage !
- Assembly must be carried out by trained personnel. Any legal regulations or regulations issued by authorities must be observed during assembly.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- When calculating the required torque, the specifications supplied by the damper manufacturers (cross section, design, installation site), and the air flow conditions must be observed.
- The device contains electrical and electronic components and is not allowed to be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Simple direct mounting	Simple direct mounting on the damper spindle with a universal spindle clamp, supplied with an anti-rotation strap to prevent the actuator from rotating.
Manual override	Manual operation is possible with the pushbutton (the gearing latch remains disengaged as long as the pushbutton is pressed or detented).
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.
Flexible signalization	Flexible signalization with adjustable auxiliary switch (0 ... 100%).

Accessories

	Description	Data sheet
Electrical accessories	Auxiliary switch S..A..	T2 - S..A..
	Feedback potentiometer P..A..	T2 - P..A..
Mechanical accessories	Various accessories (clamps, shaft extensions etc.)	T2 - Z-LM..A..

Electrical installation

Wiring diagrams

Notes

- Caution: Power supply voltage !
- Other actuators can be connected in parallel. Please note the performance data.

Direction of rotation

Auxiliary switch

Open-close control

3-point control
