LN086WP38

Round Type

ϕ3.2 mm

■ Lighting Color

- Yellow Green
- Orange

■ Absolute Maximum Ratings $T_a = 25°C$

- Yellow Green

Parameter	Symbol	Rating	Unit
Power dissipation	P_D	90	mW
Forward current	I_F	30	mA
Pulse forward current *	I_{FP}	150	mA
Reverse voltage	V_R	4	V
Operating ambient temperature	T_{opr}	–25 to +85	°C
Storage temperature	T_{stg}	–30 to +100	°C

Note) *: The condition of I_{FP} is duty 10%, Pulse width 1 msec.

- Orange

Parameter	Symbol	Rating	Unit
Power dissipation	P_D	90	mW
Forward current	I_F	30	mA
Pulse forward current *	I_{FP}	150	mA
Reverse voltage	V_R	3	V
Operating ambient temperature	T_{opr}	–25 to +85	°C
Storage temperature	T_{stg}	–30 to +100	°C

Note) *: The condition of I_{FP} is duty 10%, Pulse width 1 msec.

■ Electro-Optical Characteristics $T_a = 25°C$

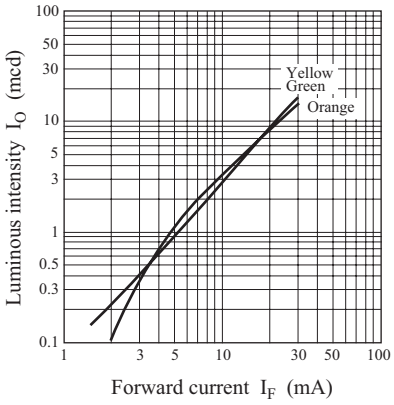
- Yellow Green

Parameter	Symbol	Conditions	Min	Typ	Max	Unit
Luminous intensity	I_O	$I_F = 20$ mA	3.0	8.0		mcd
Reverse current	I_R	$V_R = 4$ V			10	μA
Forward voltage	V_F	$I_F = 20$ mA		2.2	2.8	V
Peak emission wavelength	λ_P	$I_F = 20$ mA		565		nm
Spectral half band width	$\Delta\lambda$	$I_F = 20$ mA		30		nm
Cutoff frequency	f_C	$I_F = 20$ mA + 10 mA[p-p]		15		MHz

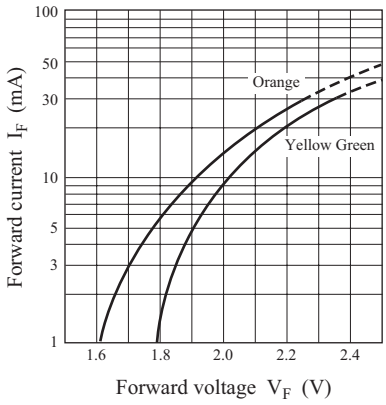
- Orange

Parameter	Symbol	Conditions	Min	Typ	Max	Unit
Luminous intensity	I_O	$I_F = 20$ mA	3.0	8.0		mcd
Reverse current	I_R	$V_R = 3$ V			10	μA
Forward voltage	V_F	$I_F = 20$ mA		2.1	2.8	V
Peak emission wavelength	λ_P	$I_F = 20$ mA		630		nm
Spectral half band width	$\Delta\lambda$	$I_F = 20$ mA		40		nm
Cutoff frequency	f_C	$I_F = 20$ mA + 10 mA[p-p]		10		MHz

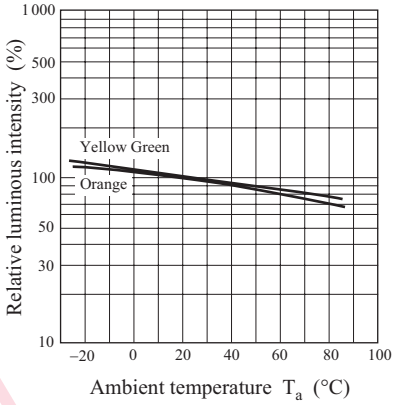
I_O — I_F



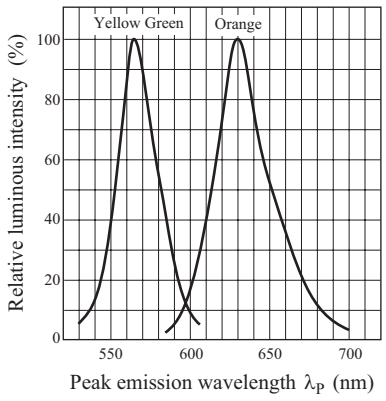
I_F — V_F



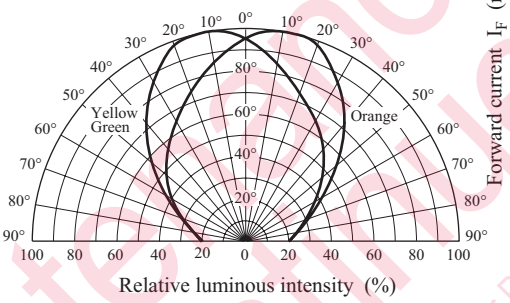
Relative luminous intensity — T_a



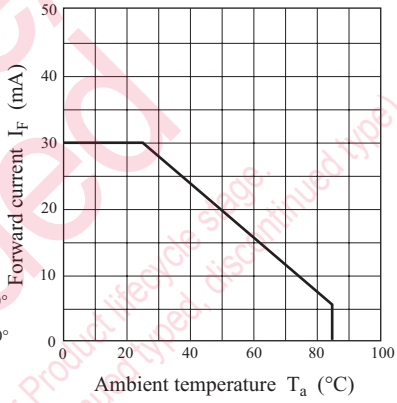
Relative luminous intensity — λ_P



Directive characteristics

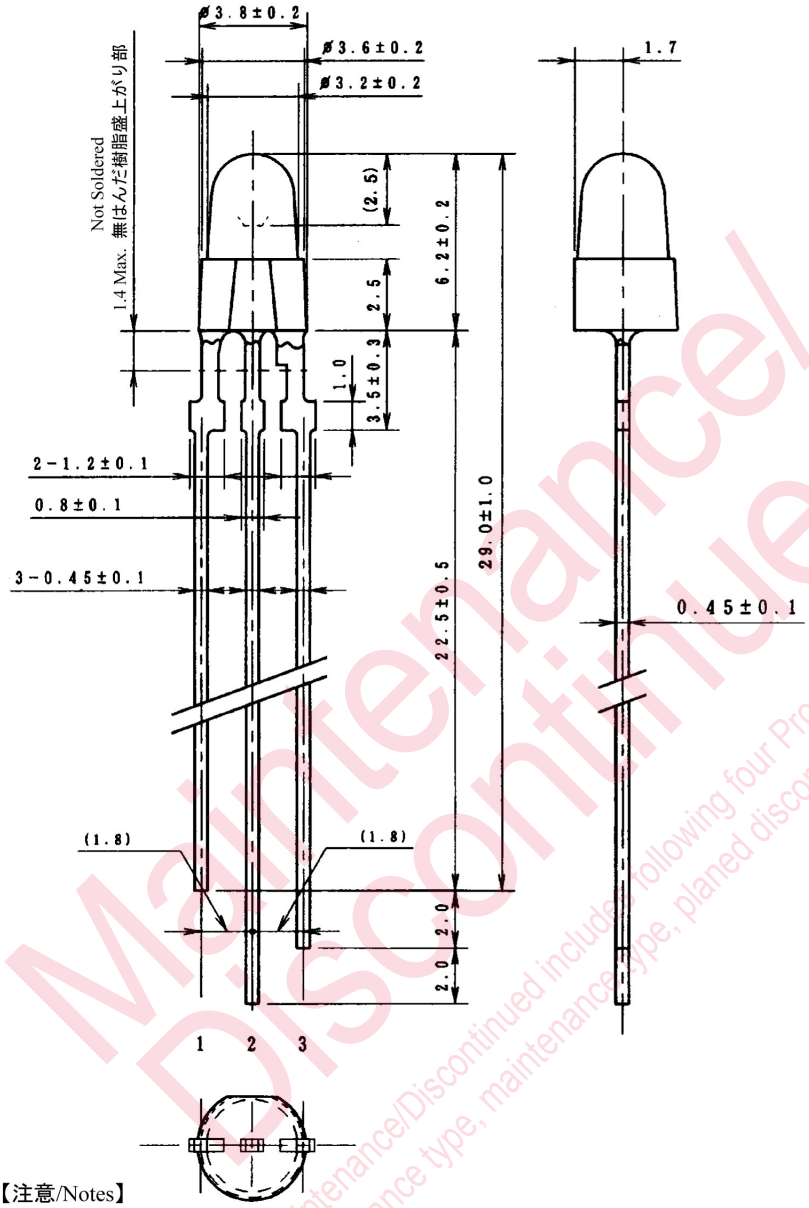


I_F — T_a



■ Package (Unit: mm)

LLXFTN3SH702



【注意/Notes】

1.指示無き寸法公差±0.2 mm/ Tolerance is ±0.2 mm unless otherwise specified.

2.※リード間寸法は樹脂根元寸法を示す/※The size between leads shows a resin root size.

3.（ ）寸法は参考値とする/( ) A size is a reference.

4.該品は樹脂部が小さい為、リード線との隙間が他品種に比較して余裕が取れません。従いまして、リード線の左右位置ずれによりリード部が露出する事があります。信頼性的に問題はありませんが、リード露出に対する設計の考慮をお願い致します。

Accordingly mis-alignment of the left and right position of the lead wire may expose the lead part. Although this will not present any problem in its reliability consideration toward lead exposure should be given in the designing.

- Pin Name

  1: Anode (Orange)

  2: Cathode (Common)

  3: Anode (Yellow Green)

Request for your special attention and precautions in using the technical information and semiconductors described in this book

(1) If any of the products or technical information described in this book is to be exported or provided to non-residents, the laws and regulations of the exporting country, especially, those with regard to security export control, must be observed.

(2) The technical information described in this book is intended only to show the main characteristics and application circuit examples of the products. No license is granted in and to any intellectual property right or other right owned by Panasonic Corporation or any other company. Therefore, no responsibility is assumed by our company as to the infringement upon any such right owned by any other company which may arise as a result of the use of technical information described in this book.

(3) The products described in this book are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
- Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
- Any applications other than the standard applications intended.

(4) The products and product specifications described in this book are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.

(5) When designing your equipment, comply with the range of absolute maximum rating and the guaranteed operating conditions (operating power supply voltage and operating environment etc.). Especially, please be careful not to exceed the range of absolute maximum rating on the transient state, such as power-on, power-off and mode-switching. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, take into the consideration of incidence of break down and failure mode, possible to occur to semiconductor products. Measures on the systems such as redundant design, arresting the spread of fire or preventing glitch are recommended in order to prevent physical injury, fire, social damages, for example, by using the products.

(6) Comply with the instructions for use in order to prevent breakdown and characteristics change due to external factors (ESD, EOS, thermal stress and mechanical stress) at the time of handling, mounting or at customer's process. When using products for which damp-proof packing is required, satisfy the conditions, such as shelf life and the elapsed time since first opening the packages.
