

300mA Low Dropout with Power_OK CMOS Voltage Regulators

■ General Description

The LN1136 series are highly precise, low noise, positive voltage LDO regulators with power-ok indicators manufactured using CMOS processes. The series achieves high ripple rejection and low dropout and consists of a standard voltage source, an error correction, current limiter and a phase compensation circuit plus a driver transistor. Output voltage is selectable in 50mV increments within a range of 1.2V ~ 6.0V. The series is also compatible with low ESR ceramic capacitors which give added output stability. This stability can be maintained even during load fluctuations due to the excellent transient response of the series.

The current limiter's feedback circuit also operates as a short protect for the output current limiter and the output pin. The CE function enables the output to be turned off, resulting in greatly reduced power consumption.

■ Applications

- Mobile phones
- Cordless phones
- modem
- Portable games

② ③	12-60	Output Voltage: eg ②=3,③=0 \Rightarrow 3.0V		R	Embossed Tape : Standard Feed
④	2	Output Voltage : 100mV increments e.g. ②=3, ③=0 , ④=2 \Rightarrow 3.0V		L	Embossed Tape : Reverse Feed

- Portable AV equipment
- Reference voltage
- Battery powered equipment
- PCMCIA cards

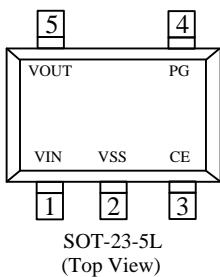

■ Features

- Output Voltage Range: 1.2V to 6.0V (selectable in 500mV steps)
- Highly Accurate : $\pm 2\%$
- Dropout Voltage: 200mV @ 100mA (3.0V type)
- Power-ok indicates: active when the output reached 95% of the normal output voltage
- High Ripple Rejection: 70dB (10 kHz)
- Low Power Consumption: 25 μ A (TYP.)
- Maximum Output Current : 300mA ($V_{IN} \geq V_{OUT} + 1V$)
- Standby Current : less than 0.1 μ A
- Internal protector: current limiter and short protector
- Small packages: SOT-23-5 and other required

■ Package

Operating Ambient Temperature	T_{opr}	-40 ~ +85		$^{\circ}\text{C}$
Storage Temperature	T_{stg}	-40 ~ +125		

Caution: The absolute maximum ratings are rated values exceeding which the product could suffer physical damage.

These values must therefore not be exceeded under any conditions.

■ Typical Application Circuit

Caution: The above connection diagram and constant will not guarantee successful operation.

Perform thorough evaluation using the actual application to set the constant.

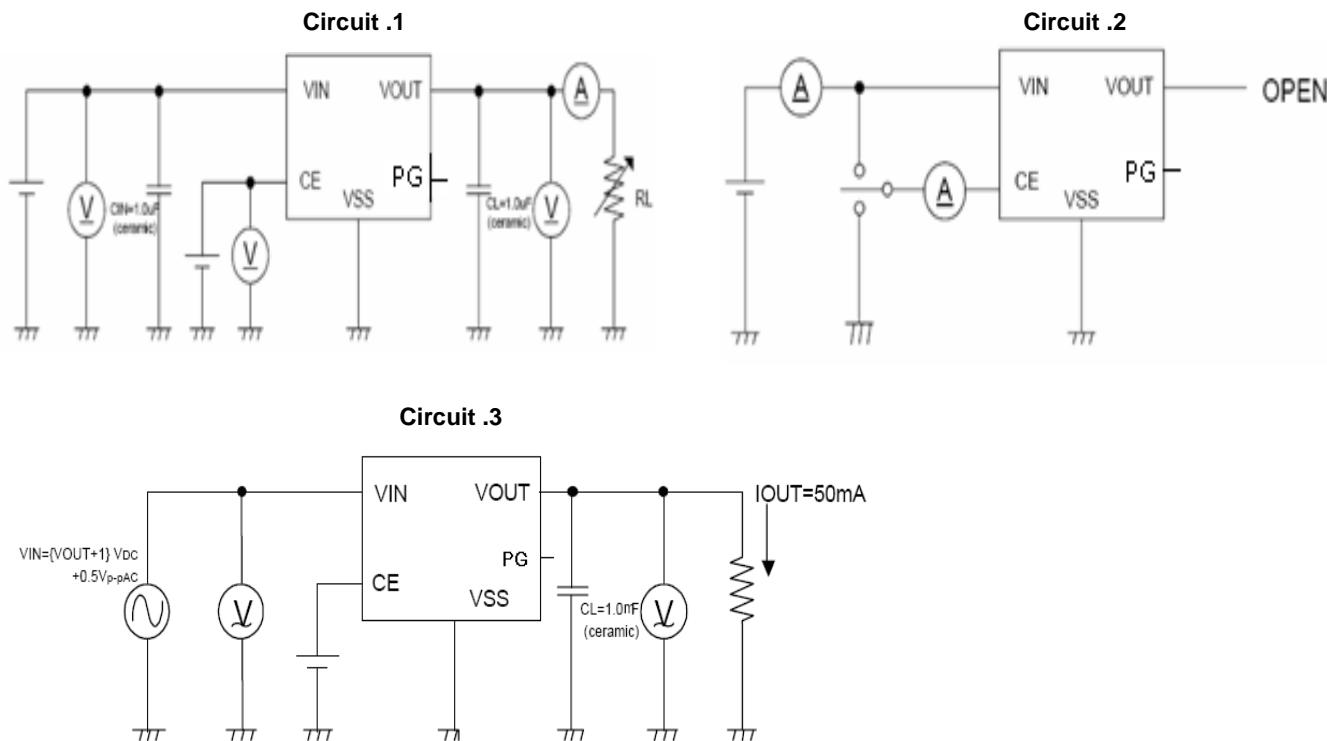

■ Application Conditions

Input capacitor (CIN): 1.0 μ F or more

Output capacitor (CL): 1.0 μ F or more (tantalum capacitor)

Caution A general series regulator may oscillate, depending on the external components selected. Check that no oscillation occurs with the application using the above capacitor.
