

Data Sheet

LoPAC™ Family

PFC Mini, PFC Micro, PFC MicroS

Power Factor Corrected, AC-DC Switchers

Family Features

- Near unity power factor
- EN61000-3-2 harmonic current compliance
- Low profile package
- Output power to 1,500W
- Up to 6 user specifiable outputs
- Universal AC input
- Power density up to 11W/in³
- Integral cooling fans
- New “Autosense” feature
- Safety agency approvals: UL, CUL, TÜV, VDE, CE Marked

Overview

The PFC MicroS, PFC Micro and PFC Mini are members of the new low profile, high-density LoPAC series of power factor corrected AC-DC power supplies. Available as a one, two or three slot package, respectively, each LoPAC slot can be configured with standard Vicor DC-DC converter modules enabling up to six user specifiable isolated outputs in a package only 1.75" (44.5mm) high with a power density of 11W/in³.

For maximum versatility and flexibility, the LoPAC can be configured with Vicor 1st Generation VI-26x (full brick), VI-J6x (half brick) or 2nd Generation V375 Series full, half and quarter brick modules. These modules cover the entire range of outputs from 1 to 100Vdc and 25 to 600 Watts. We will factory configure the optimum solution based on your exact requirements.

All units comply with FCC Class A and certain configurations meet FCC & EN55022 Class B for conducted EMI. Harmonic current limits per EN61000-3-2 and Surge Immunity per IEC61000-4-5 Level 3, in addition to a wide variety of safety agency approvals, further enhance the LoPAC flexibility.

PFC Mini
12.20" x 6.00" x 1.75"
309,9 x 152,4 x 44,5 mm
Up to 1,500W
1 to 6 Outputs

PFC Micro
10.40" x 5.06" x 1.86"
264,1 x 128,5 x 47,3 mm
Up to 800W
1 to 6 Outputs

PFC MicroS
7.95" x 5.06" x 1.86"
201,9 x 128,5 x 47,3 mm
Up to 600W
1 to 3 Outputs

DC Output Selections

The versatility of the LoPAC series is due, in large part, to the wide array of Vicor modules available to be configured into the different package formats. Slots can be populated with 1st or 2nd Generation modules in full, half or quarter brick sizes. Vicor's full VI-26x, VI-J6x and V375 standard product

matrices are available to choose from. In addition, the full range of non-standard voltages and powers from 1 to 100Vdc and 10 to 600W is also available for inclusion. The table below is just a sampling of some of the most popular standard outputs that can be configured into LoPAC slots.

Output Voltage	Available Power (W) per Package Size						
	Maxi			Mini			Micro
	2nd Gen	1st Gen		2nd Gen	1st Gen		2nd Gen
2Vdc	160	80	60	100	40	30	50
3.3Vdc	264	132	99	150	66	50	75
5Vdc	400	200	150	200	100	75	100
12Vdc	600	200	150	300	100	75	150
15Vdc	600	200	150	300	100	75	150
24Vdc	600	200	150	300	100	75	150
28Vdc	600	200	150	300	100	75	150
48Vdc	600	200	150	300	100	75	150

LoPAC Slot Configurations

The DC-DC converter modules are used to populate each LoPAC converter slot. Each slot can be configured in different ways depending on module sizes and power limitations.

The following table summarizes the available slot configurations for each of the three LoPAC packages.

Model Type	# Slots	Maximum Output Power			Modules per Slot
		Total		per Slot	
		@ 230Vac	@ 115Vac		
PFC Mini	3	1,500W	800W	500W	1 Maxi or 2 Minis
PFC Micro	2	800W	500W	600W	1 Maxi or 2 Minis or 3 Micros
PFC MicroS	1	600W	500W	600W	1 Maxi or 2 Minis or 3 Micros

Autosense Feature*

This is a new feature implemented in all converter slots in the LoPAC family. If remote sense connections are not needed or are inadvertently not made, no local sense connections are necessary. Simply connect the output(s) to the load and the

converter(s) will automatically operate in the local sense mode. If remote sense connections are made, the unit will operate in remote sense mode.

*Applies to converter slots utilizing Maxi or Mini size converters.

Part Numbering

Performance Specifications

The following are typical performance specifications at room ambient temperature, nominal line voltage (115/230Vac) and 75% load on all outputs, unless specified otherwise. For detail

specifications, consult the Design Guide for the LoPAC configuration of interest. This is available from any sales office (see Back Cover) or our web site (vicorpower.com).

INPUT CHARACTERISTICS

Parameter	PFC Mini	PFC Micro	PFC MicroS	Units	Notes
AC Input					
Voltage	85-264			Vac	
Frequency	47-500			Hz	
DC Input	100-380	100-300		Vdc	
Line Regulation	0.4			%	From low line to high line
Inrush Current					
@ 115Vac	30	5		A rms	
@ 230Vac	60	10		A rms	
Ride Through Time					
@ load	1,200	500		ms	
Conducted EMI/RFI	FCC Class A EN55022 Class A	FCC Class A EN55022 Class A (<i>consult factory</i>)			PFC Mini with 1st Gen units meets FCC & EN Class B
Power Factor	>0.98				>75% load
Harmonic Current Limits	EN61000-3-2/A14				Class A
Surge Immunity	IEC61000-4-5				Level 3 Performance Criteria B
Dielectric Withstand					
Primary to Chassis GND	2,121			Vdc	
Primary to Secondary	4,242			Vdc	
Secondary to Chassis GND	750			Vdc	

OUTPUT CHARACTERISTICS

Parameter	PFC Mini	PFC Micro	PFC MicroS	Units	Notes
Setpoint Accuracy	0.5			%	of Vnom
Load Regulation	0.05			%	10% to full load
	0.2			%	No load to full load
Temperature Regulation	0.005			%/°C	-20° to +65°C
Long Term Drift	0.02			%/khr	
Output Ripple & Noise					
≤10Vout	100			mV	20 MHz bandwidth
>10Vout	1.0			% Vout	20 MHz bandwidth
Voltage Trim Range					
1st Gen Slots	50-110			% Vout	±10% on 10-15 Vout
2nd Gen Slots	10-110			% Vout	Preload may be required
Remote Sense Compensation	0.5			Vdc	Autosense (See page 2)
OVP Set Point	125			% Vout	Not available on 1st Gen Minis
Current Limit	115			% Imax	Auto recovery

ENVIRONMENTAL CHARACTERISTICS

Parameter	PFC Mini	PFC Micro	PFC MicroS	Units	Notes
Storage Temperature	-40 to +85			°C	
Operating Temperature					
Full Rated Power	-20 to +45			°C	
50% Rated Power	-20 to +65			°C	
Safety Approvals	UL, CUL, TÜV, VDE, CE Marked				

MECHANICAL CHARACTERISTICS

Parameter	PFC Mini	PFC Micro	PFC MicroS	Units	Notes
Weight	5.5	5.2	3.1	lbs	
	2.5	2.4	1.4	kg

MATING CONNECTOR:
16 PIN HOUSING: MOLEX (39-01-2160)
TERMINAL FEM CRIMP 18-24 AWG: MOLEX (39-00-0039)
USE CRIMP TOOL: MOLEX (11-01-0197)

The following accessories are available for the LoPAC units:

Connector Kits

A complete set of mating hardware for all combinations of input & output connections

PFC Mini	19-130047
PFC Micro & PFC MicroS	19-130044

Current Share Boards

Used for current sharing between identical LoPAC Models for increased output power or redundancy

LoPACs with 1st Gen Modules	CSB01
LoPACs with 2nd Gen Modules	CSB02

Vicor's comprehensive line of power solutions includes modular, high density DC-DC converters and accessory components, configurable power supplies, and custom power systems.

The latest data is available on the Vicor web site at vicorpower.com.

Westcor, a division of Vicor, designs and builds fan cooled, configurable power supplies incorporating Vicor's high density DC-DC converters and accessory components. Westcor's product line includes:

- PFC Mini
- PFC Micro
- PFC MicroS
- Autoranging MegaPAC
- Mini MegaPAC
- PFC MegaPAC
- PFC MegaPAC (High Power)
- PFC MegaPAC-EL (Low Noise)
- 3 Phase/4kW MegaPAC
- 3 Phase/4kW MegaPAC-EL (Low Noise)
- ConverterPACs
